Executive Summary

Discussion of current state and performance trends

	Core OI	Net Income	(Attributable to valuation losses)
FY2023	-149	-312	(-170)
FY2024	100	20	(-3)

- FY2023 ended with a major loss of 312 bn. yen. Valuation losses accounted for 170 bn. yen of that loss.
- The greatest management challenge is to achieve a V-shaped recovery in FY2024.

Immediate-term, concentrated measures to improve business performance

- Revising upward our cash generation target from 500 bn. yen to 600 bn. yen

Fundamental structural reforms

Revival strategy

- Sumitomo Pharma is leveraging capabilities across the corporate group to pursue rationalization and stop the hemorrhaging ASAP. Aside from expanding sales of its 3 core products, all options are on the table to resume growth.
- About Petro Rabigh, a joint task force will be formed soon for intensive discussions to find optimal strategies to improve PRC profitability.

Growth strategy

- Formulate a new growth strategy with the long-term aim to become an Innovative Solution Provider.
- Agriculture and ICT as growth drivers. Concentrate management resources to target 100 bn. yen in Core Operating Income from each by 2030.
- Expand leading-edge medicine as next-generation growth area.
- Shift direction of Petrochemicals to create value over the long run with technologies that reduce environmental impact.

(2) Immediate-term, concentrated measures to improve business performance

Add an incremental 100 bn. yen to 500 bn. yen cash generation target

Original targets		Current targets	
Cash generation (by the end of FY2024) About 500 bn. yen		▶ Revise upward to 600 bn. yen	
 Rebuild businesses	Cash generation: 120 bn. yen	▶ Cash generation: Raise to 150 bn. yen	
 Reduce inventories	Reduction of approx. 150 bn. yen vs. the end of FY2023 H1	▶ 75 bn. yen reduction as of the end. FY2023 Continue to target 150 bn. yen reduction by end of FY2024	
 More selective investments (cash basis)	100 bn. yen reduction vs. Plan (3-yr cum.)	▶ Achieve 150 bn. yen reduction through additional down-selection	
 Sell assets and leverage surplus funds	Sell shareholdings: 50 bn. yen	▶ Raise to 60 bn. yen with additional dispositions	
	Surplus funds: 70 bn. yen	▶ Line of sight into achieving 70 bn. yen Look for incremental opportunities	
	Sale of other assets: 30 bn. yen	▶ Add to 30 bn. yen with sale of wellness facilities	
Currently achieved about 400 bn. yen			

Core operating income will achieve a V-shaped recovery of 250 billion yen

Sumitomo Pharma: +134.0 bn. yen

- ✓ Thorough cost reduction and expand sales of 3 key products (Details below)

excl. Sumitomo Pharma: +85.0 bn. yen

〈Effects of implemented projects〉: Total +66.0 bn. yen

- ✓ Contribution to existing investment effects/Sales expansion : +33.0 bn. yen
 - Increased shipments in new crop protection products, etc.
 - Profit contribution from enhancements in semiconductor materials
- ✓ Cost reduction/rationalization : +33.0 bn. yen
 - Effects of business restructuring and production line reorganization (including impairment effects)

〈Effects of business environment improvement, etc.〉: +19.0 bn. yen

- Petrochemical market prices to bottom out
- Recovery of PRC scheduled maintenance and troubles in FY2023

Immediate-term concentrated measures: +30.0 bn

- ✓ Contribution of immediate-term, concentrated measures to improve business performance

Stop the bleeding and rebuild with revival strategy, then aim for sustainable growth based on new growth strategies.

Fundamental structural reforms

Revival strategy

- ✓ Rebuild Sumitomo Pharma
- ✓ Petrochemicals business
 - Review of positioning of Petro Rabigh business
 - Rebuild Japan and Singapore business

Growth strategy

- ✓ Agrosolutions and ICT as two growth drivers

Agro & life solutions

ICT solutions

- ✓ New growth areas

Advanced medical solutions

- ✓ Fundamental areas

Essential & green materials

- ✓ Separate and reorganize Energy & Functional materials sector
- ✓ Reorganize CDMO business of small molecule drugs

Quickly stop the bleeding while we consider all options to return to growth

Stop the bleeding

Shrink into a suitable cost structure and turn profitable at the core operating income level in FY2024

- ✓ Thorough rationalization of SG&A and R&D expenses

Sumitomo Chemical's role

- Leverage knowledge from third-party corporate turnaround experts and support rationalization
- Strengthen governance by dispatching multiple management personnel
- Financial support through debt guarantees

Integrated group

In parallel

Return to growth

- ✓ Expand sales of 3 key products
- ✓ Develop two cancer drugs
- ✓ Integrated operations in regenerative medicine & cell therapies

Pursue best growth model

(6) Revival Strategy: Review positioning of Petro Rabigh

Joint taskforce to be formed for intensive discussions to improve PRC profitability

Current status

- Symbolic project that represents partnership between Saudi Arabia and Japan
- Growing losses due to the **changes in external environment** (prolonged downturn in petroleum and petrochemicals markets and revisions to official fixed feedstock and fuel prices)
- **Divergence in strategic directions and business positioning** between Sumitomo Chemical and Saudi Aramco (Sumitomo Chemical is shifting away from commodity chemicals toward specialty chemicals and has completed the transfer of technology to PRC, fulfilling its major role in the project)
- Sumitomo Chemical **does not plan to provide PRC with additional funding** that increases its exposure to PRC's performance

1st Step

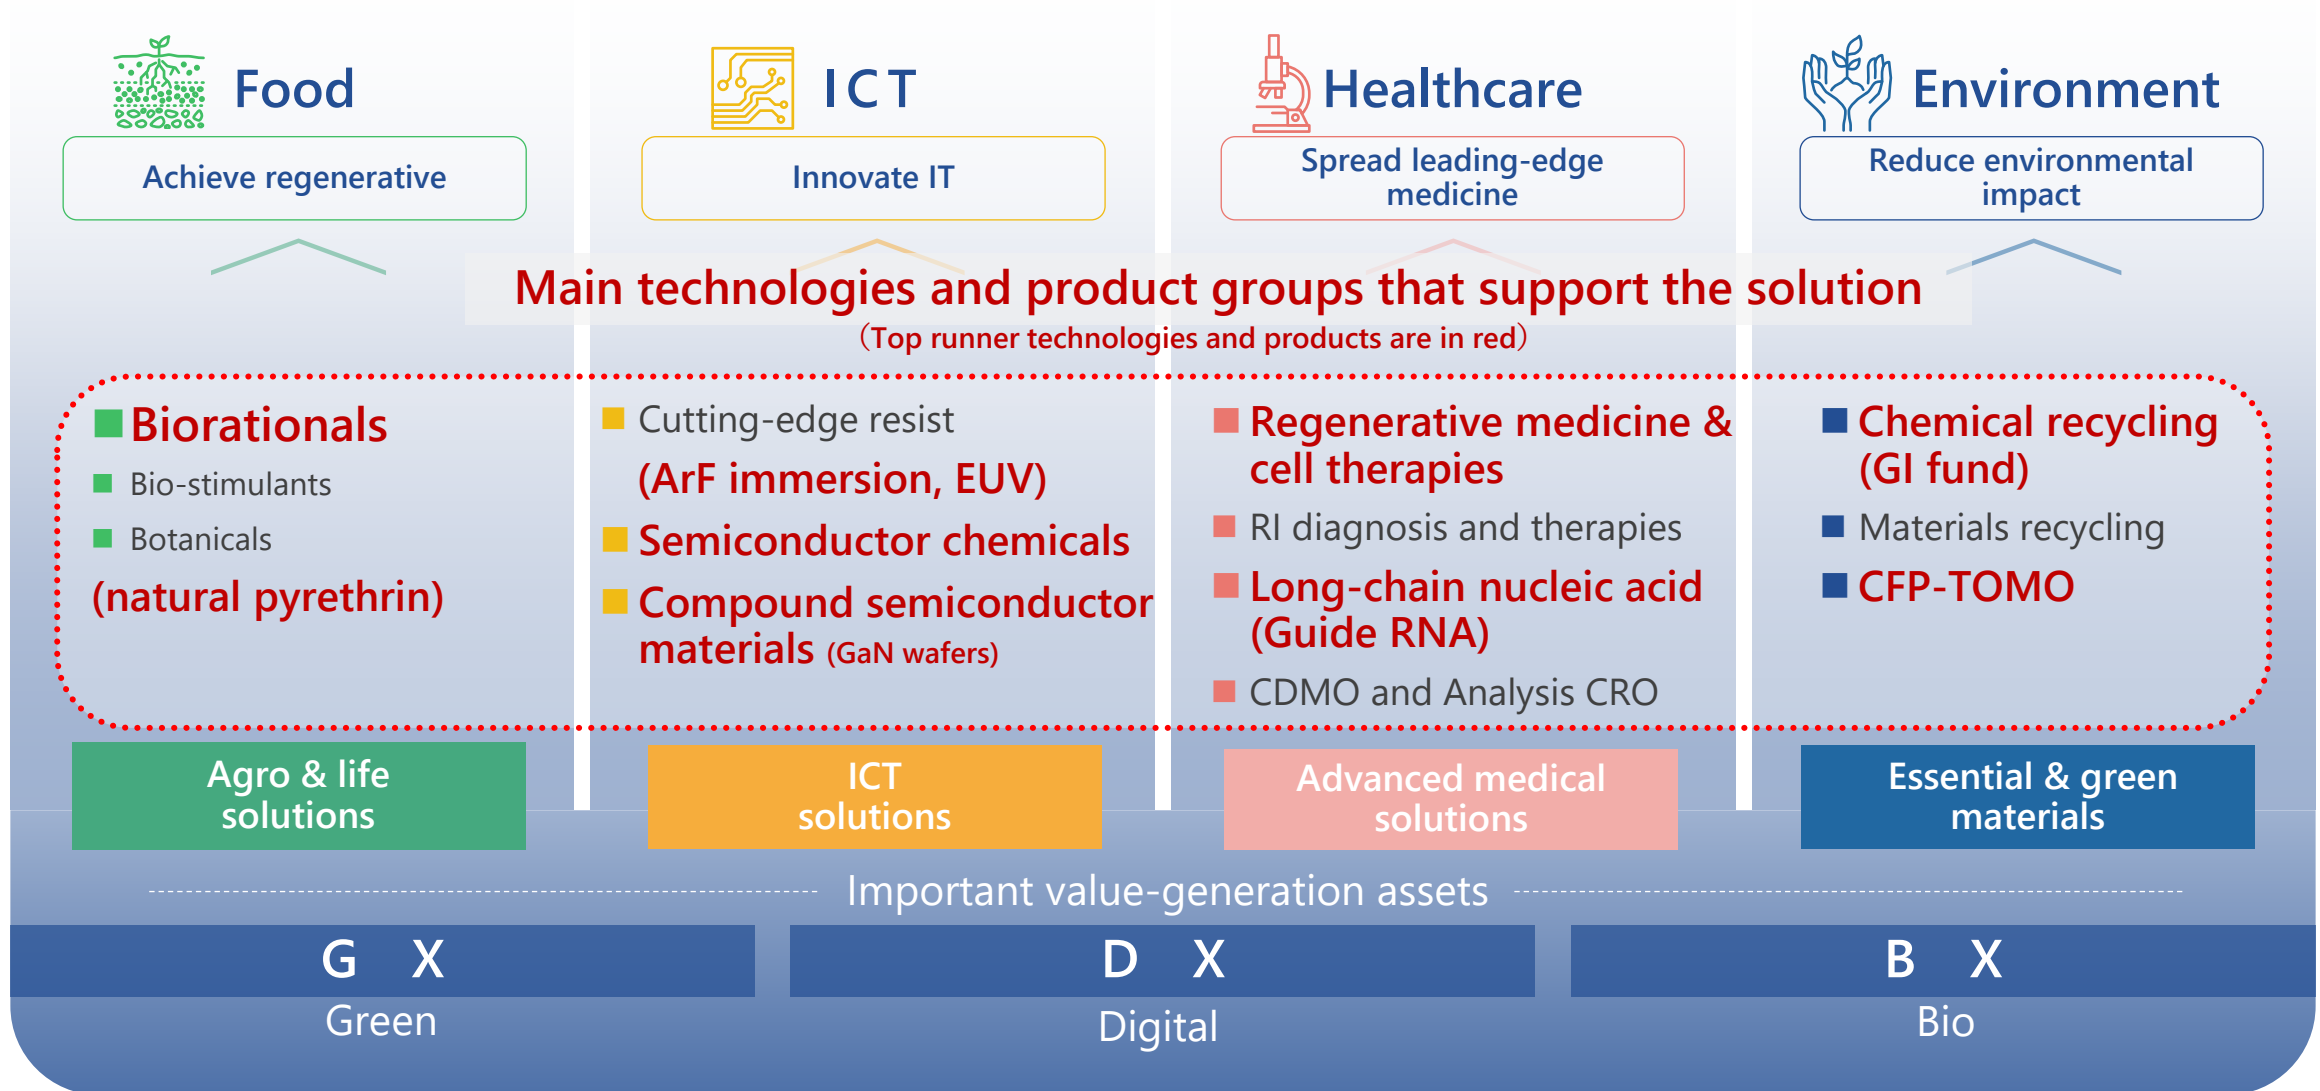

Reached a mutual understanding with Saudi Aramco on PRC's challenges

Next step

A joint task force will be formed soon for intensive discussions to find optimal strategies to improve PRC profitability

(7) Long-term vision ~A company that solves social issues with innovative technology~

Innovative Solution Provider

(8) Positioning of new business areas within the growth strategy

Clarify strategic positioning in each business domain. Be unique.

**Growth
drivers**

Agro & life solutions

ICT solutions

Former ICT + parts of E&FM

Position as our flagship domains and pursue high growth and high earnings

**New
growth
areas**

Advanced medical solutions

Excluding drug discovery

Quickly develop as a next-generation growth driver

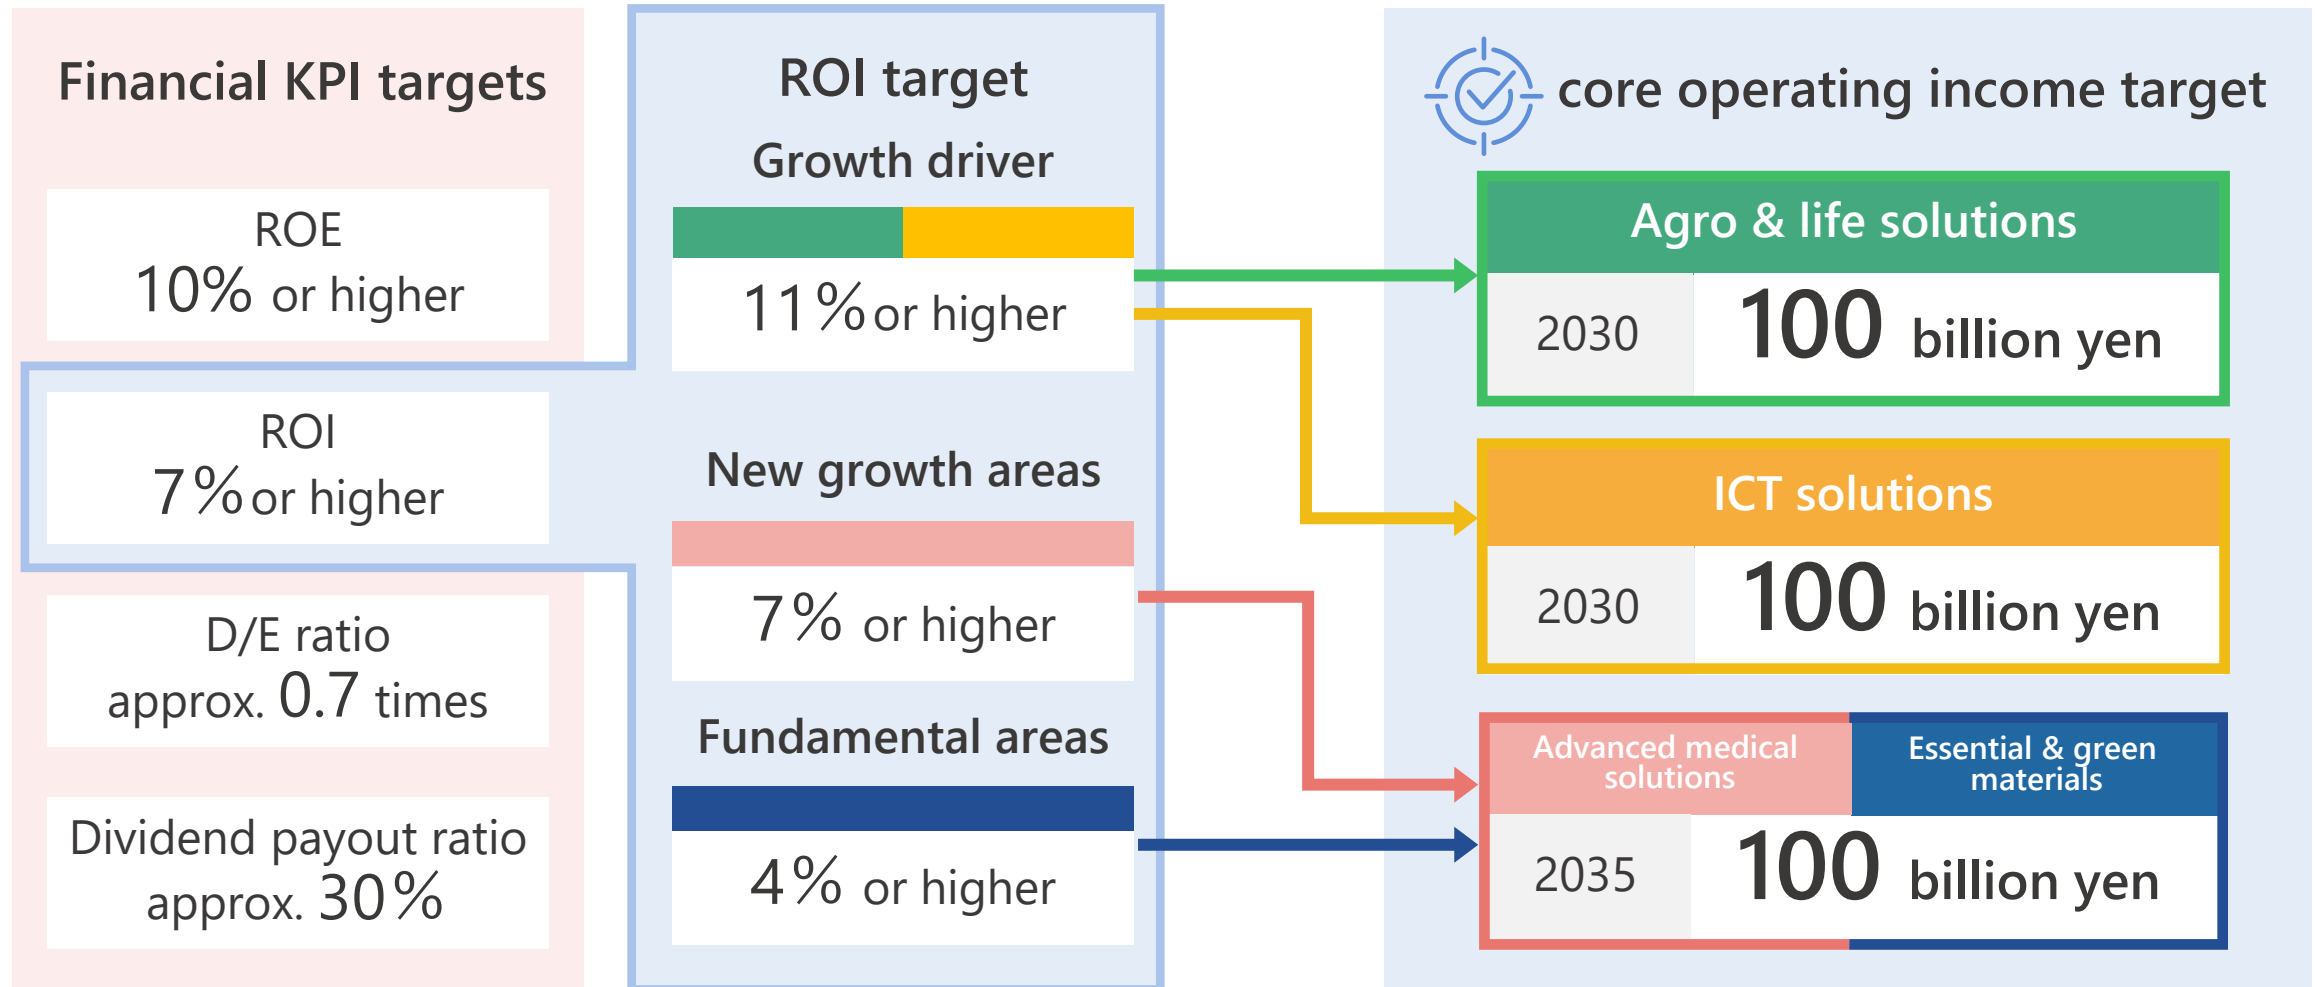

**Core
domains**

Essential & green materials

Shift direction to create value through the reduction of environmental impact

Reorganize into four business segments, effective October 2024

Concentrate management resources on two growth drivers and aim to achieve a core operating income of 100 billion yen in each sector in FY2030.

First and foremost, a V-shaped recovery is a must. Then, we strengthen our financial standing and return to a growth trajectory.

Build a new growth model

- Concentrate management resources in agriculture and ICT
- Strengthen financial fundamentals

Toward further growth

- Deploy into society businesses that reduce environmental impact (including agriculture)
- Full entry into regenerative & cell medicine

(Billions of yen)

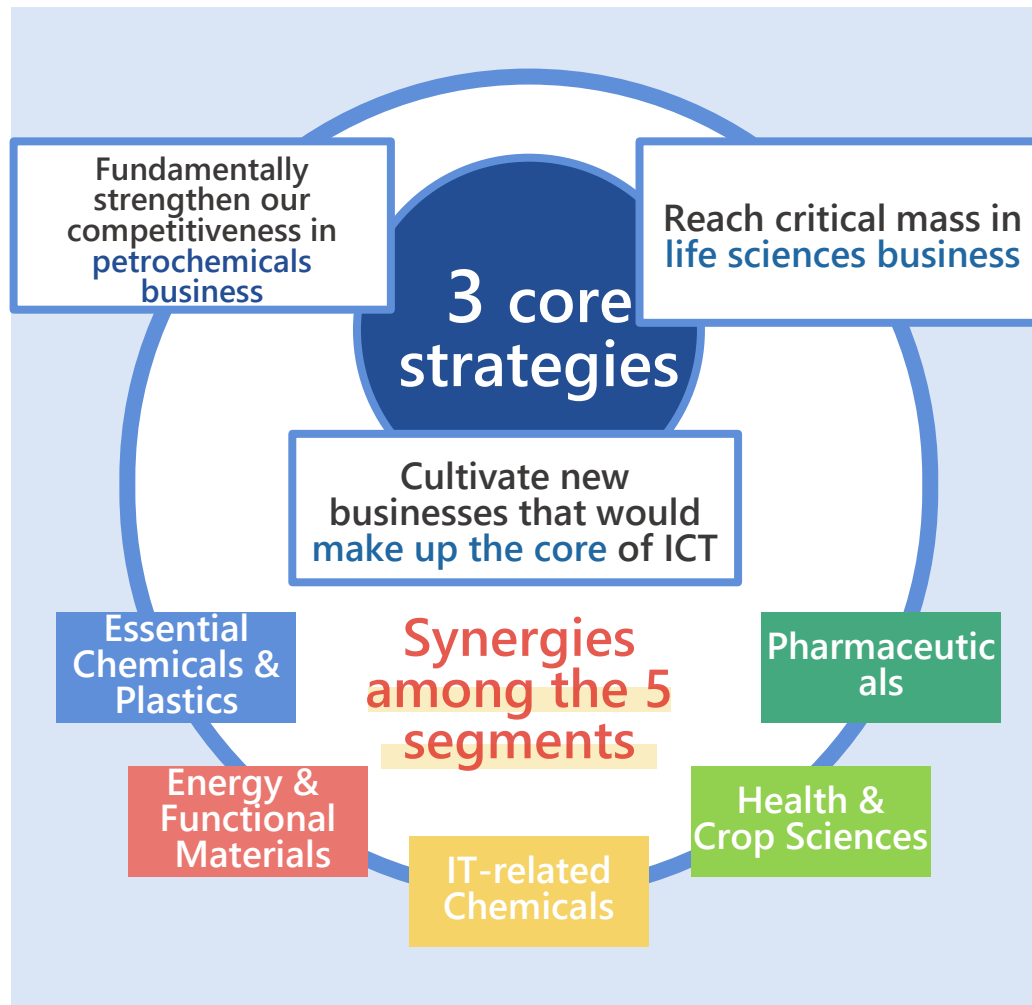

Section

1

Discussion of the current state
and the results in FY2023

A look back on our management strategy (1)

Pursue 3 core strategies. Since 2005, ramped up investments in Petro Rabigh and Sumitomo Pharma

Capital expenditures, loans and investments
(based on the timing of the green-light decision)

A look back on our management strategy (2)

Over the past 20 years H&CS, ICT and other non-petrochemical sales have grown steadily

Health & Crop Sciences overseas sales

Expanded Agrosolutions footprint

IT-related Chemicals sales

Developed into growth driver

Pharmaceuticals sales

Grew substantially up to
the patent cliff

A look back on our management strategy (3)

On the other hand, the growth model based on five business sectors is reaching its limits due to internal and external factors

External factors

Accelerating commoditization of technology

Construction of new large-scale plant in China

Increased difficulty in developing new drugs

Commodity product slump

Petro Rabigh

Petrochemical

Methionine

Rise of Chinese companies

Materials for large LCDs

Petrochemical

Methionine

Patent cliff

LATUDA

Internal factors

Dispersion of management resources through diversified management

Lack of discernment and development ability in pharmaceuticals

Lack of competitiveness of growth drivers

FY2023 Performance Forecast

Core operating Income is in line with previous forecast. Net Income Attributable to Owners of the Parent is down due to Sumitomo Pharma's Impairment loss on intangible assets.

(Billions of yen)

	FY2023 Forecast (February) A	FY2023 Forecast B	(Sumitomo Pharma)	Change B-A	Reasons for change
Sales Revenue	2480.0	2,447.0	314.6	-33.0	
Core Operating Income	-145.0	-149.0	-133.0	-4.0	See the next page.
Non-recurring Items	-140.0	-340.0	-221.9	-200.0	Sumitomo Pharma's Impairment loss on intangible assets
Operating Income (IFRS)	-285.0	-489.0	-354.9	-204.0	
Finance Income/expenses	5.0	26.0	31.7	21.0	
Taxes	-35.0	-3.0	8.2	32.0	Decreased in tax burden due to impairment loss
Net income attributable to non-controlling interests	70.0	154.0	152.0	84.0	Deterioration of earnings at Sumitomo Pharma
Net Income Attributable to Owners of the Parent	-245.0	-312.0	-163.0	-67.0	
Naphtha price	¥69,000/kl	¥69,100/kl			
Exchange rate	¥143.75/\$	¥144.59/\$			

FY2023 Core Operating Income by Sector

While IT-related Chemicals sales remained steady, sales of Health & Crop Sciences were at the same level as the previous forecast due to factors such as unseasonable weather.

(Billions of yen)

		FY2023 Forecast (February)	FY2023 Forecast	(Sumitomo Pharma)	Change	Reasons for change
Essential Chemicals & Plastics	excl. PRC	-24.0	-26.0	-	-2.0	
	PRC	-63.0	-65.0	-	-2.0	
Energy & Functional Materials		5.0	8.0	-	3.0	
IT-related Chemicals		38.0	44.0	-	6.0	Increased shipments in semiconductor materials
Health & Crop Sciences		40.0	31.0	-	-9.0	Unsettled weather in South America
Pharmaceuticals		-131.0	-133.0	-133.0	-2.0	
Others		-10.0	-8.0	-	2.0	
Total		-145.0	-149.0	-133.0	-4.0	

Non-ordinary items

Towards structural reform, remove the negative factors completely and lead it to the V-shaped recovery planned for FY2024.

non-ordinary items -340 bn. yen  net income basis : about -210 bn. yen
(Valuation loss broken out about -270 bn. yen  net income basis : about -170 bn. yen)
(about 80%)

(Billions of yen)

Full year total	
Related to Sumitomo Pharma	-221.9
Impairment loss (MYFEMBREE®, etc.)	-180.9
Reorganization of North American subsidiaries	-30.1
Others (loss on disposal of property, plant and equipment, etc.)	-10.9
Other than Sumitomo Pharma	-118.1
Impairment loss (petrochemicals in Japan, MMA in Singapore, etc.)	-88.5
Others (loss on disposal of property, plant and equipment, etc.)	-29.6
Total	-340

**Immediate-term,
concentrated measures
to improve business
performance**
and the FY2024 performance forecast.

Progress on immediate-term, concentrated measures to improve business performance (Summary)

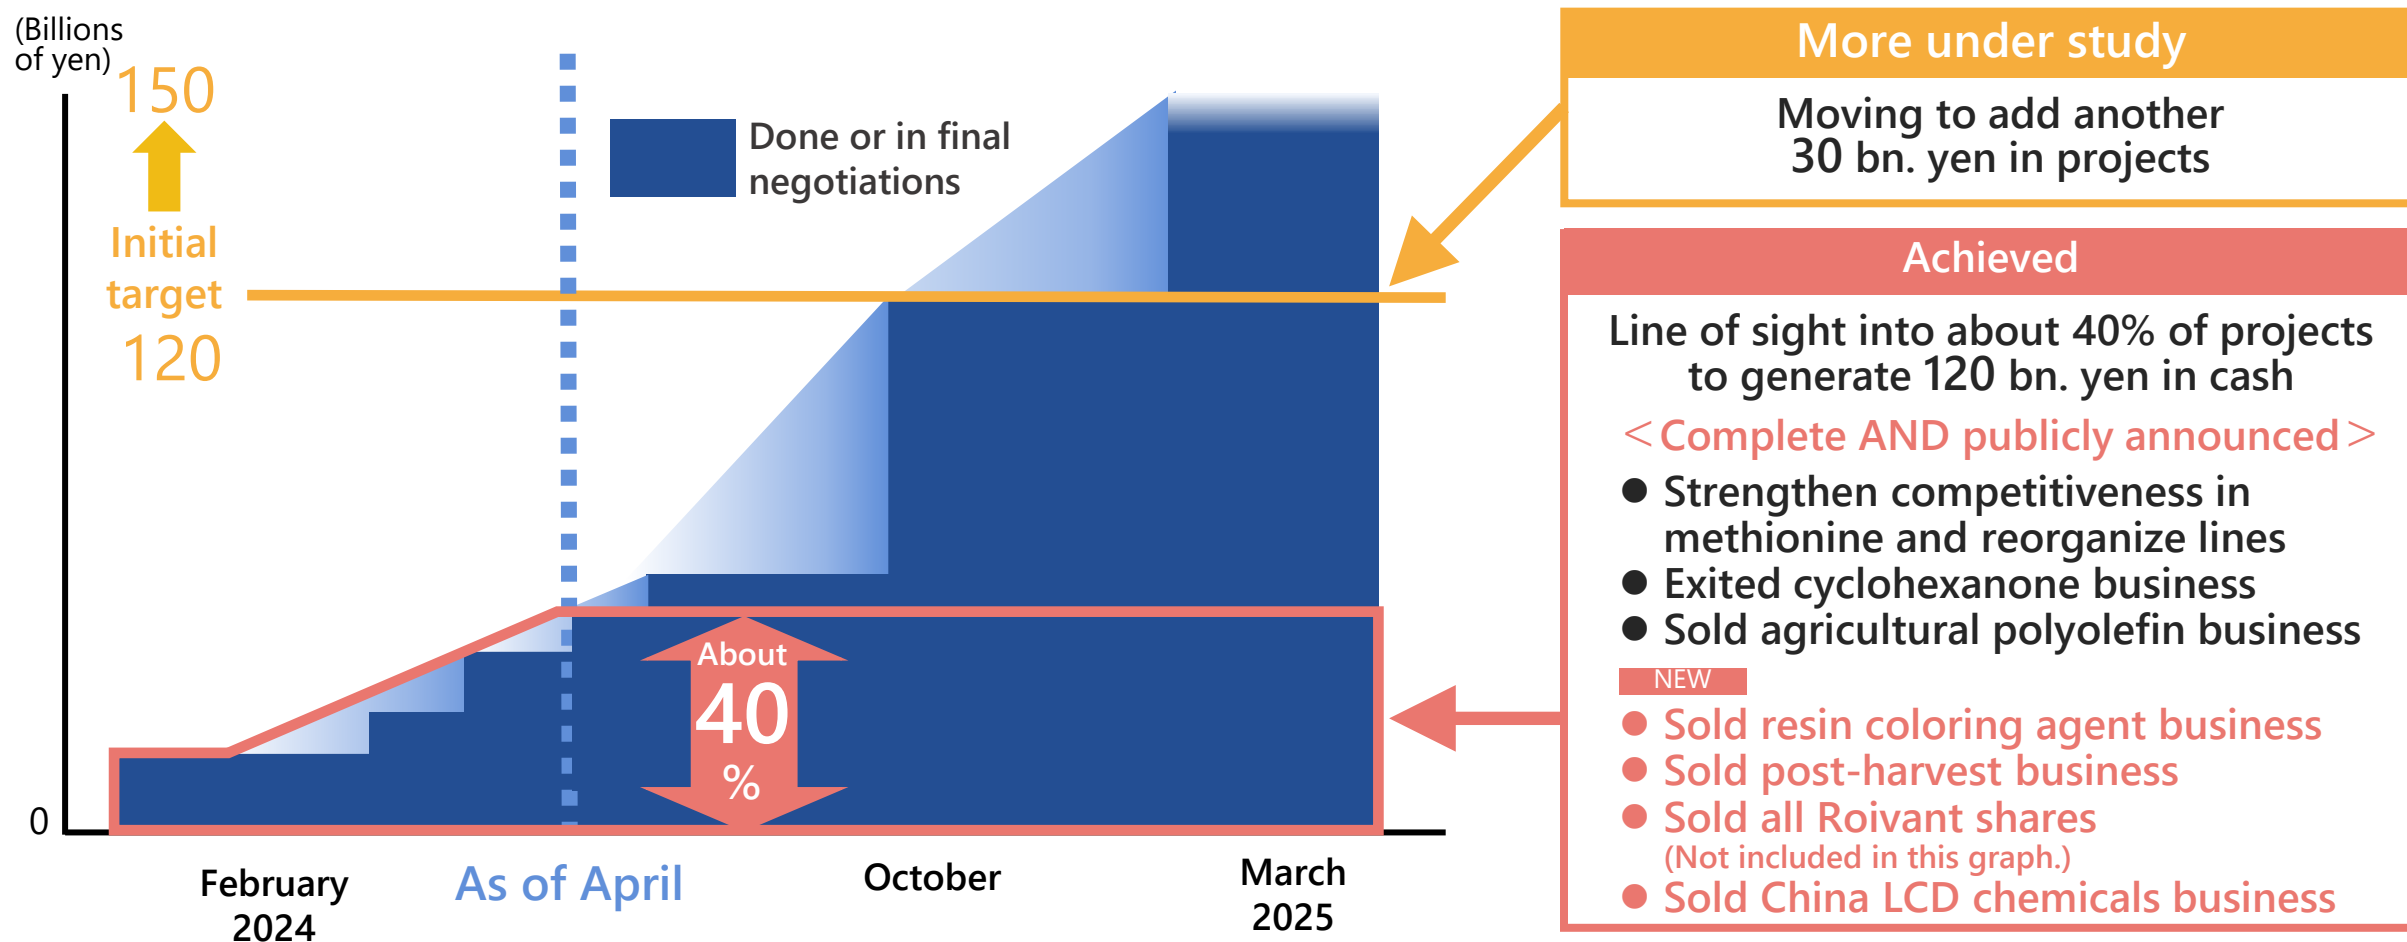

Add an incremental 100 bn. yen to 500 bn. yen cash generation target

Original targets		Current targets
Cash generation (by the end of FY2024) About 500 bn. yen		▶ Revise upward to 600 bn. yen
 Rebuild businesses	Cash generation: 120 bn. yen	▶ Cash generation: Raise to 150 bn. yen
 Reduce inventories	Reduction of approx. 150 bn. yen vs. the end of FY2023 H1	▶ 75 bn. yen reduction as of the end. FY2023 Continue to target 150 bn. yen reduction by end of FY2024
 More selective investments (cash basis)	100 bn. yen reduction vs. Plan (3-yr cum.)	▶ Achieve 150 bn. yen reduction through additional down-selection
 Sell assets and leverage surplus funds	Sell shareholdings: 50 bn. yen Surplus funds: 70 bn. yen Sale of other assets: 30 bn. yen	▶ Raise to 60 bn. yen with additional dispositions ▶ Line of sight into achieving 70 bn. yen Look for incremental opportunities ▶ Add to 30 bn. yen with sale of wellness facilities
		Currently achieved about 400 bn. yen

Progress in rebuilding businesses

Accelerate sale of noncore businesses from the perspective of best owner
Already achieved about 40% on cash basis.

Illustration of the status of about 30 projects to rebuild businesses

Achieved 75 bn. yen inventory reduction Further strengthen investment down-selection

Reduce inventories

Forecast inventory reductions

800 bn. yen → 650 bn. yen

(Target approx. 150 bn. yen reduction by the end of March 2025)

- Approx. **75 bn. yen** reduction by the end of March 2024 (Achieved **50%+** of target in a half year)
- Target further reductions by leveraging DX or exiting or selling businesses

More selective investments

FY2022 through FY2024 forecast (cash basis)

Reduce from 700 bn. yen to 550 bn. yen

(Target approx. 150 bn. yen reduction by the end of March 2025)

- Selective investments in growth areas such as biorationals and high-performance materials
- **Consider a further 50 bn. yen in down-selection**

(Billions of yen) Consolidated balance of inventories

(Billions of yen) FY2022-2024 cumulative capital expenditures, loans and investments plan (cash basis)

Accelerating the sale of cross-shareholdings with the aim of reducing holdings to zero.

Sale of cross-shareholdings

(Target : 50 bn. Yen
(by the end of FY2024))

- Have sold shares of operating companies and financial institutions (Approx. 41 bn. yen during FY2023)
- Approx 60 bn. yen is expected, including sales during FY2024

Sale of other assets

(Target : 30 bn. Yen
(by the end of FY2024))

- Have sold shares of Inabata & Co., Ltd. (Approx. 24 bn. yen)
- Sale of welfare facilities, etc. (Approx. 10 bn. yen)

Surplus funds

(Target : 70 bn. Yen
(by the end of FY2024))

- Leverage surplus funds at overseas group companies via group finance (CMS, etc.)
- Approx. 70 bn. yen has already been generated by the end of FY2023. Aiming for further gains.

FY2024 Performance Forecast vs FY2023 Forecast

Aiming for a V-shaped recovery, Core Operating Income is 100.0 bn. yen,
Net Income Attributable to Owners of the Parent is 20.0 bn. yen

	FY2023 Forecast	FY2024 Forecast	Change	Reasons for change	(Billions of yen) FY2022 Actual
Sales Revenue	2,447.0	2,670.0	223.0		2,895.3
Core Operating Income	-149.0	100.0	249.0	See the next page.	92.8
Non-recurring Items	-340.0	-30.0	310.0	Large impairment loss in Pharmaceuticals and Essential Chemicals & Plastics previous year	-123.7
Operating Income (IFRS)	-489.0	70.0	559.0		-31.0
Finance income/expenses, Taxes, Net income attributable to non- controlling interests	177.0	-50.0	-227.0	Sumitomo Pharma's business performance improvement, etc.	38.0
Net Income Attributable to Owners of the Parent	-312.0	20.0	332.0		7.0

Naphtha price	¥69,100/kl	¥75,000/kl
Exchange rate	¥144.59/\$	¥145.00/\$

Exchange rate sensitivity

1 yen/dollar yen depreciation ⇒
Core Operating Income +1.5 bn. yen
Finance income/expenses+2.0 bn. yen

Main non-recurring Items

Restructuring costs -20.0
Loss on retirement of fixed
assets, etc. -10.0

¥76,600/kl

¥135.50/\$

FY2024 Core Operating Income Analysis (vs FY2023)

Achieve a V-shaped recovery by thoroughly rationalizing Sumitomo Pharma, expanding sales in each field, realizing the effects of implemented projects, and promoting short-term concentrated performance improvement measures.

Sumitomo Pharma: +134.0 bn. yen

- ✓ **Thorough cost reduction and expand sales of 3 key products**
(Details below)

excl. Sumitomo Pharma: +85.0 bn. yen

〈Effects of implemented projects〉: **Total +66.0 bn. yen**

- ✓ **Contribution to existing investment effects/Sales expansion** : +33.0 bn. yen
 - Increased shipments in new crop protection products, etc.
 - Profit contribution from enhancements in semiconductor materials
- ✓ **Cost reduction/rationalization** : +33.0 bn. yen
 - Effects of business restructuring and production line reorganization (including impairment effects)

〈Effects of business environment improvement, etc.〉: **+19.0 bn. yen**

- Petrochemical market prices to bottom out
- Recovery of PRC scheduled maintenance and troubles in FY2023

Immediate-term concentrated measures: +30.0 bn

- ✓ **Contribution of immediate-term, concentrated measures to improve business performance**

FY2024 Core Operating Income by Sector

Expected significant improvements mainly in Pharmaceuticals and Essential chemicals & Plastics

	FY2023 Forecast	FY2024 Forecast	Change	Reasons for change	(Billions of yen) FY2022 Actual
Essential Chemicals & Plastics	-91.0	-35.0	56.0	Cost rationalization through business restructuring and similar measures	-34.2
(PRC broken out)	(-65.0)	Non-disclosure	(N.A)	Trade terms and conditions to improve PRC scheduled maintenance, troubles, etc. in previous year	(-10.6)
Energy & Functional Materials	8.0	11.0	3.0	Increased shipments in resorcinol and engineering plastics, etc.	15.2
IT-related Chemicals	44.0	47.0	3.0	Increased shipments in semiconductor materials	47.6
Health & Crop Sciences	31.0	62.0	31.0	Increased shipments in new crop protection products Improved trade terms and conditions in methionine	57.3
Pharmaceuticals	-133.0	3.0	136.0	Thorough rationalization of SG&A and R&D expenses Expand sales of three key products	16.2
Others	-8.0	12.0	20.0	Contribution of immediate-term, concentrated measures to improve business performance	-9.3
Total	-149.0	100.0	249.0		92.8

Interest-bearing liabilities and debt to equity ratio

After peak in FY2023, reduce interest-bearing liabilities from immediate-term, concentrated measures to improve business performance

From peak year FY2023, improve financial standing by asset and business dispositions

(Billions of yen)

Interest-bearing liabilities forecast

Cash flows from operating activities :
+ 160 bn. yen

- ✓ Income before taxes : +30 bn. yen
- ✓ Depreciation and amortization : +150 bn. yen
- ✓ Decrease of working capital : +50 bn. yen
Funds freed up from inventory reduction
- ✓ Income taxes, etc. : -70 bn. yen

Cash flows from investing activities : -190 bn. yen

- ✓ Capital Expenditures • Loans
Carefully select projects in growth areas
Further compression under consideration

Total free cash flows from ordinary business activity : -30 bn. yen

Cash generation from immediate measures : +300 bn. yen

- ✓ Rebuild businesses • Sell assets

Total free cash flows : +270 bn. yen

(included source of dividends)

Further improve financial standing

Shareholder returns

Despite a V-shaped recovery expected in fiscal 2024, prioritize strengthening financial standing and maintain dividends at annual DPS of 9 yen.

Section

3

Fundamental structural reforms (overview)

Stop the bleeding and rebuild with revival strategy, then aim for sustainable growth based on new growth strategies.

Fundamental structural reforms

Revival strategy

- ✓ Rebuild Sumitomo Pharma
- ✓ Petrochemicals business
 - Review of positioning of Petro Rabigh business
 - Rebuild Japan and Singapore business

Growth strategy

- ✓ Agrosolutions and ICT as two growth drivers
 - Agro & life solutions
 - ICT solutions
- ✓ New growth areas
 - Advanced medical solutions
- ✓ Fundamental areas
 - Essential & green materials
- ✓ Separate and reorganize Energy & Functional materials sector
- ✓ Reorganize CDMO business of small molecule drugs

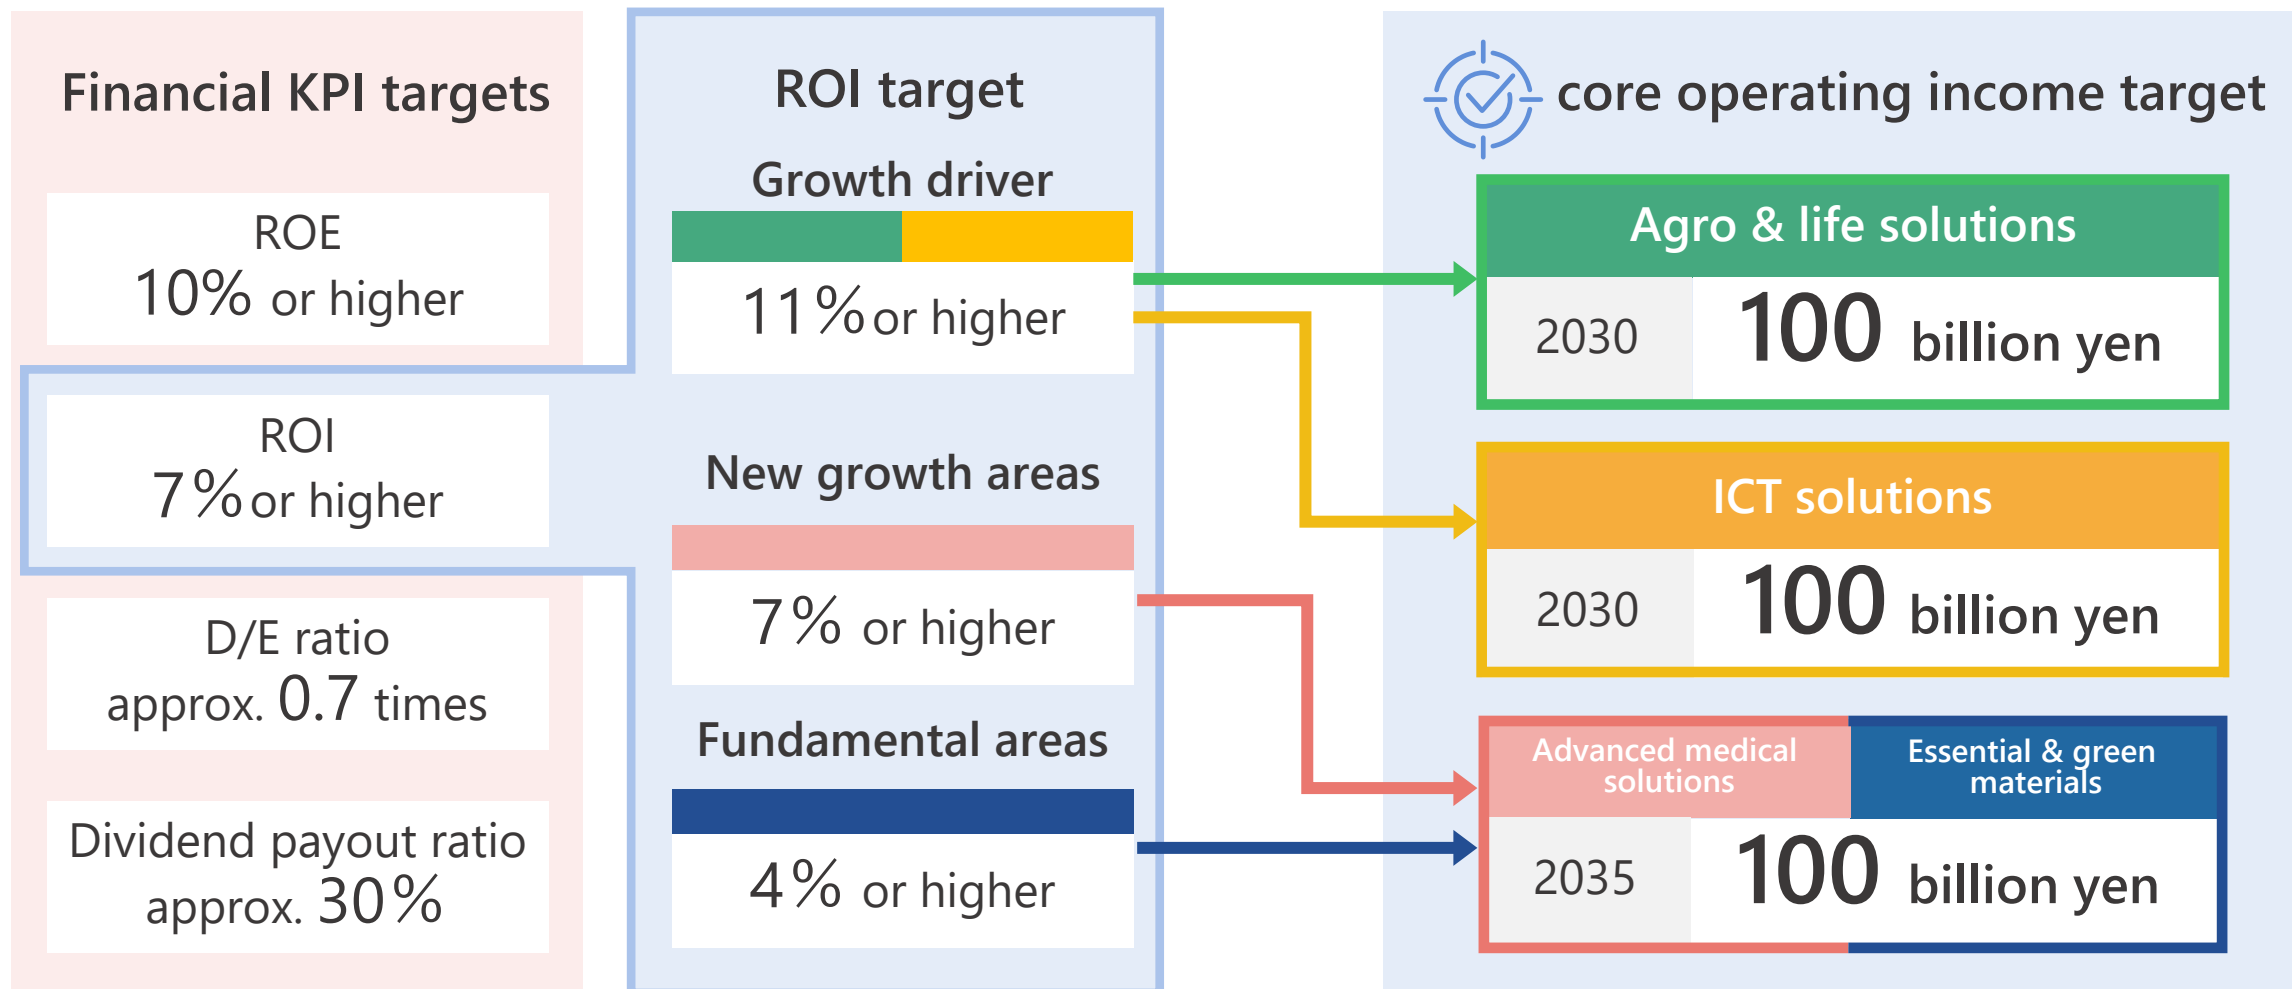

Innovative Solution Provider

Long-term targets

Slide reused

Set ROI targets for each Sector.

Concentrate management resources on two growth drivers and aim to achieve a core operating income of 100 billion yen in each sector in FY2030.

Toward sustainable growth

Slide reused

First and foremost, a V-shaped recovery is a must. Then, we strengthen our financial standing and return to a growth trajectory.

Build a new growth model

- Concentrate management resources in agriculture and ICT
- Strengthen financial fundamentals

Toward further growth

- Deploy into society businesses that reduce environmental impact (including agriculture)
- Full entry into regenerative & cell medicine

(Billions of yen)

Section

3-1

Fundamental structural reforms (Revival Strategy)

Quickly stop the bleeding while we consider all options to return to growth

Stop the bleeding

Integrated group

Return to growth

Shrink into a suitable cost structure and turn profitable at the core operating income level in FY2024

- ✓ Thorough rationalization of SG&A and R&D expenses

Sumitomo Chemical's role

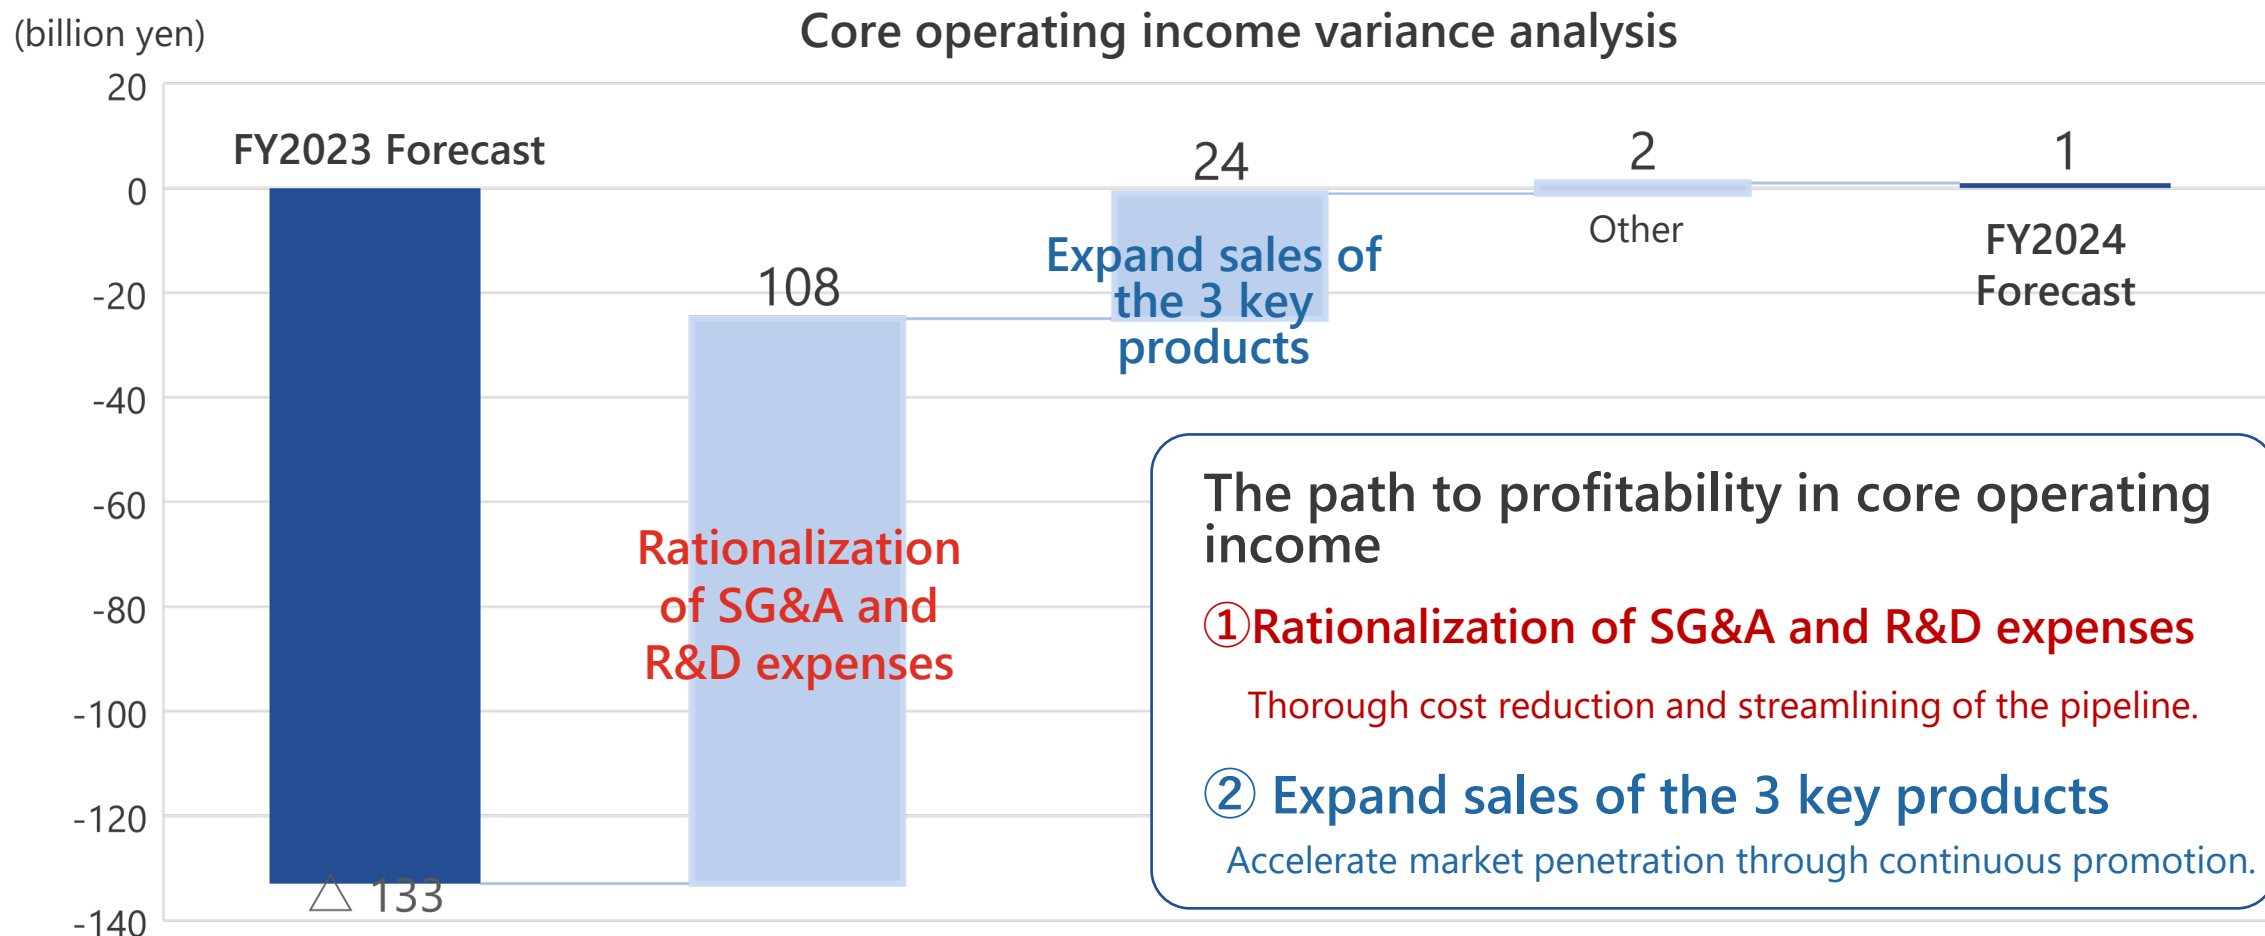

- Leverage knowledge from third-party corporate turnaround experts and support rationalization
- Strengthen governance by dispatching multiple management personnel
- Financial support through debt guarantees

In parallel

- ✓ Expand sales of 3 key products
- ✓ Develop two cancer drugs
- ✓ Integrated operations in regenerative medicine & cell therapies

Pursue best growth model

Through rigorous streamlining and expanding sales of the three key products, we aim to achieve profitability in core operating income in FY2024.

Sumitomo Pharma (3): Breakdown of thorough rationalization of SG&A and R&D expenses

Reduce more than 100 bn. yen in costs in North America. Accelerate additional rationalization measures in Japan, too.

Fuse knowledge from Sumitomo Chemical and a team of corporate turnaround experts and accelerate initiatives for further improvements across the entire group

Sumitomo Pharma (4): Expand sales of three key products

Solid growth of the three key products. Accelerate market penetration with additional promotions

Continue to educate market on efficacy, safety and other product strengths

Product name	Indications	Initiatives in FY2024
ORGOVYX 	Advanced prostate cancer	<ul style="list-style-type: none"> Establish position as first line drug leveraging revision to standard treatment guidelines for oncology
GEMTESA 	Overactive bladder	<ul style="list-style-type: none"> Drive penetration of differentiation of GEMTESA leveraging its high safety Appropriate promotions preparing for expanded indication for overactive bladder in men with benign prostatic hyperplasia
MYFEMBREE 	Uterine fibroids Endometriosis	<ul style="list-style-type: none"> Increase awareness and expand GnRH market by strengthening media advertising

Concentrate R&D resources on two cancer drugs with high potential

TP-3654

Efficacy

Myelofibrosis

Strengths

- (1) Suppresses reproduction of cancer cells
- (2) Fewer side effects than standard treatments
- (3) Potential for substantial growth as concomitant with standard treatments

Development plans

Currently Phase I/II trials (Japan, US)
Planned launch: FY 2027 (Japan, US)

Potential for peak sales of 100 bn. yen

DSP-5336

Efficacy

Acute myeloid leukemia

Strengths

- (1) Suppresses increase of leukemia cells
- (2) High safety compared to competitor drugs

Development plans

Currently Phase I/II trials (Japan, US)
Planned launch: FY 2026 (Japan, US)

Potential for peak sales of 50 bn. yen

Potential to become growth drivers supporting the earnings base over the medium- to long-term

Establish new company for regenerative medicine & cell therapies and accelerate commercialization through integrated operations

Strengths of our corporate group

- 1 Frontrunner inside and outside Japan in commercialization of iPS cells

⇒ Moving toward launch of world's first iPS cell-derived product

- 2 Completed the build out of an integrated manufacturing, sales and R&D regime in both Japan and the US

Establish new company for regenerative medicine & cell therapies

Establish in FY2024 and accelerate deployment in Japan and US

Sumitomo Chemical

Sumitomo Pharma

New company

- Deliver globally new value that can only be achieved through regenerative medicine
- Already began developing therapies in the US. Also preparing foray in US CDMO market

Planned indications	Geography	Development status and target for launch
Pediatric congenital athymia RETHYMIC	US	Launched in March 2022
Parkinson's disease (Qualified for accelerated (<i>sakigake</i>) screening)	Japan	Obtain approval before the end of FY2024
	US	Begin Phase 1/2 studies
Retinal pigment epithelium tear	Japan	In Phase 1/2 studies ⇒ Target market launch in FY2028

Fully ramp up Japan business by FY2027 to reach business scale of more than 100 bn. yen globally in the 2030s

Joint taskforce to be formed for intensive discussions to improve PRC profitability

Current status

- Symbolic project that represents partnership between Saudi Arabia and Japan
- Growing losses due to the **changes in external environment** (prolonged downturn in petroleum and petrochemicals markets and revisions to official fixed feedstock and fuel prices)
- **Divergence in strategic directions and business positioning** between Sumitomo Chemical and Saudi Aramco (Sumitomo Chemical is shifting away from commodity chemicals toward specialty chemicals and has completed the transfer of technology to PRC, fulfilling its major role in the project)
- Sumitomo Chemical **does not plan to provide PRC with additional funding** that increases its exposure to PRC's performance

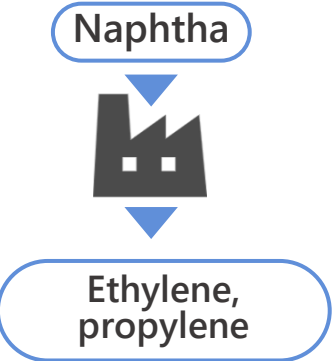

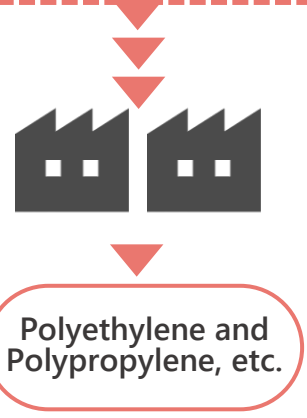

1st Step

Reached a mutual understanding with Saudi Aramco on PRC's challenges

Next step

A joint task force will be formed soon for intensive discussions to find optimal strategies to improve PRC profitability

To survive, business reorganization measures need to be more concrete

		Domestic	Singapore
<div>Upstream</div> 		<ul style="list-style-type: none"> • Rationalization at existing ethylene plant <ul style="list-style-type: none"> • Discussing rationalization measures of Keiyo Ethylene, which possesses 700k of the 2 million tons of production capacity in the Keiyo area • Convert to a complex with a reduced environmental impact <ul style="list-style-type: none"> • Continue to study Keiyo area alliance (since November 2023) 	<ul style="list-style-type: none"> • Establish restructuring council with participation from parent company • Study optimization based on scenario analysis of consolidation with neighboring plants • Thorough cost reductions from cheap cracker feedstock and other cost measures • Discuss measures aimed at becoming Carbon Neutral
		<ul style="list-style-type: none"> • Polyolefin collaboration <ul style="list-style-type: none"> • Working toward deeper discussions • Solid reorganization of unprofitable businesses <ul style="list-style-type: none"> • Exit from cyclohexane and resin coloring agent businesses • Promote further reorganization of unprofitable and noncore businesses 	<ul style="list-style-type: none"> • Begin programs aimed at profitability improvement <ul style="list-style-type: none"> • Focus on specialty high-profit grades such as PP for batteries and mono-material packaging films • By the end of FY2024, formulate strategic plan for further profitability improvements

Strengthen management base through governance reforms and personnel optimization

Strengthen monitoring functions of the Board of Directors

Change composition of the Board of Directors

Add 1 external director to reach 50%

Strengthen monitoring functions

Select internal directors from the President, Chairman and **executive officers with oversight spanning the organization**

Place import on optimizing across the company as a whole

Optimize personnel structure

Business dispositions, rebuilding and rationalization such as restructuring at Sumitomo Pharma, etc.

— Parent company —

Redeploy and rationalize HQ overhead functions (approx. 20%)

Section

3-2

Fundamental structural reforms (Growth Strategy)

Trends in four important social issues for value creation

Continuing to exhibit our presence by solving society's challenges

Food supply

- Stable food supply
- Sustainable agriculture

ICT

- Acceleration in the importance of digital technologies
- Strengthening the supply chain

Healthcare

- Secure healthy lifestyles
- Expanding market for leading-edge medicines, etc.

Environment

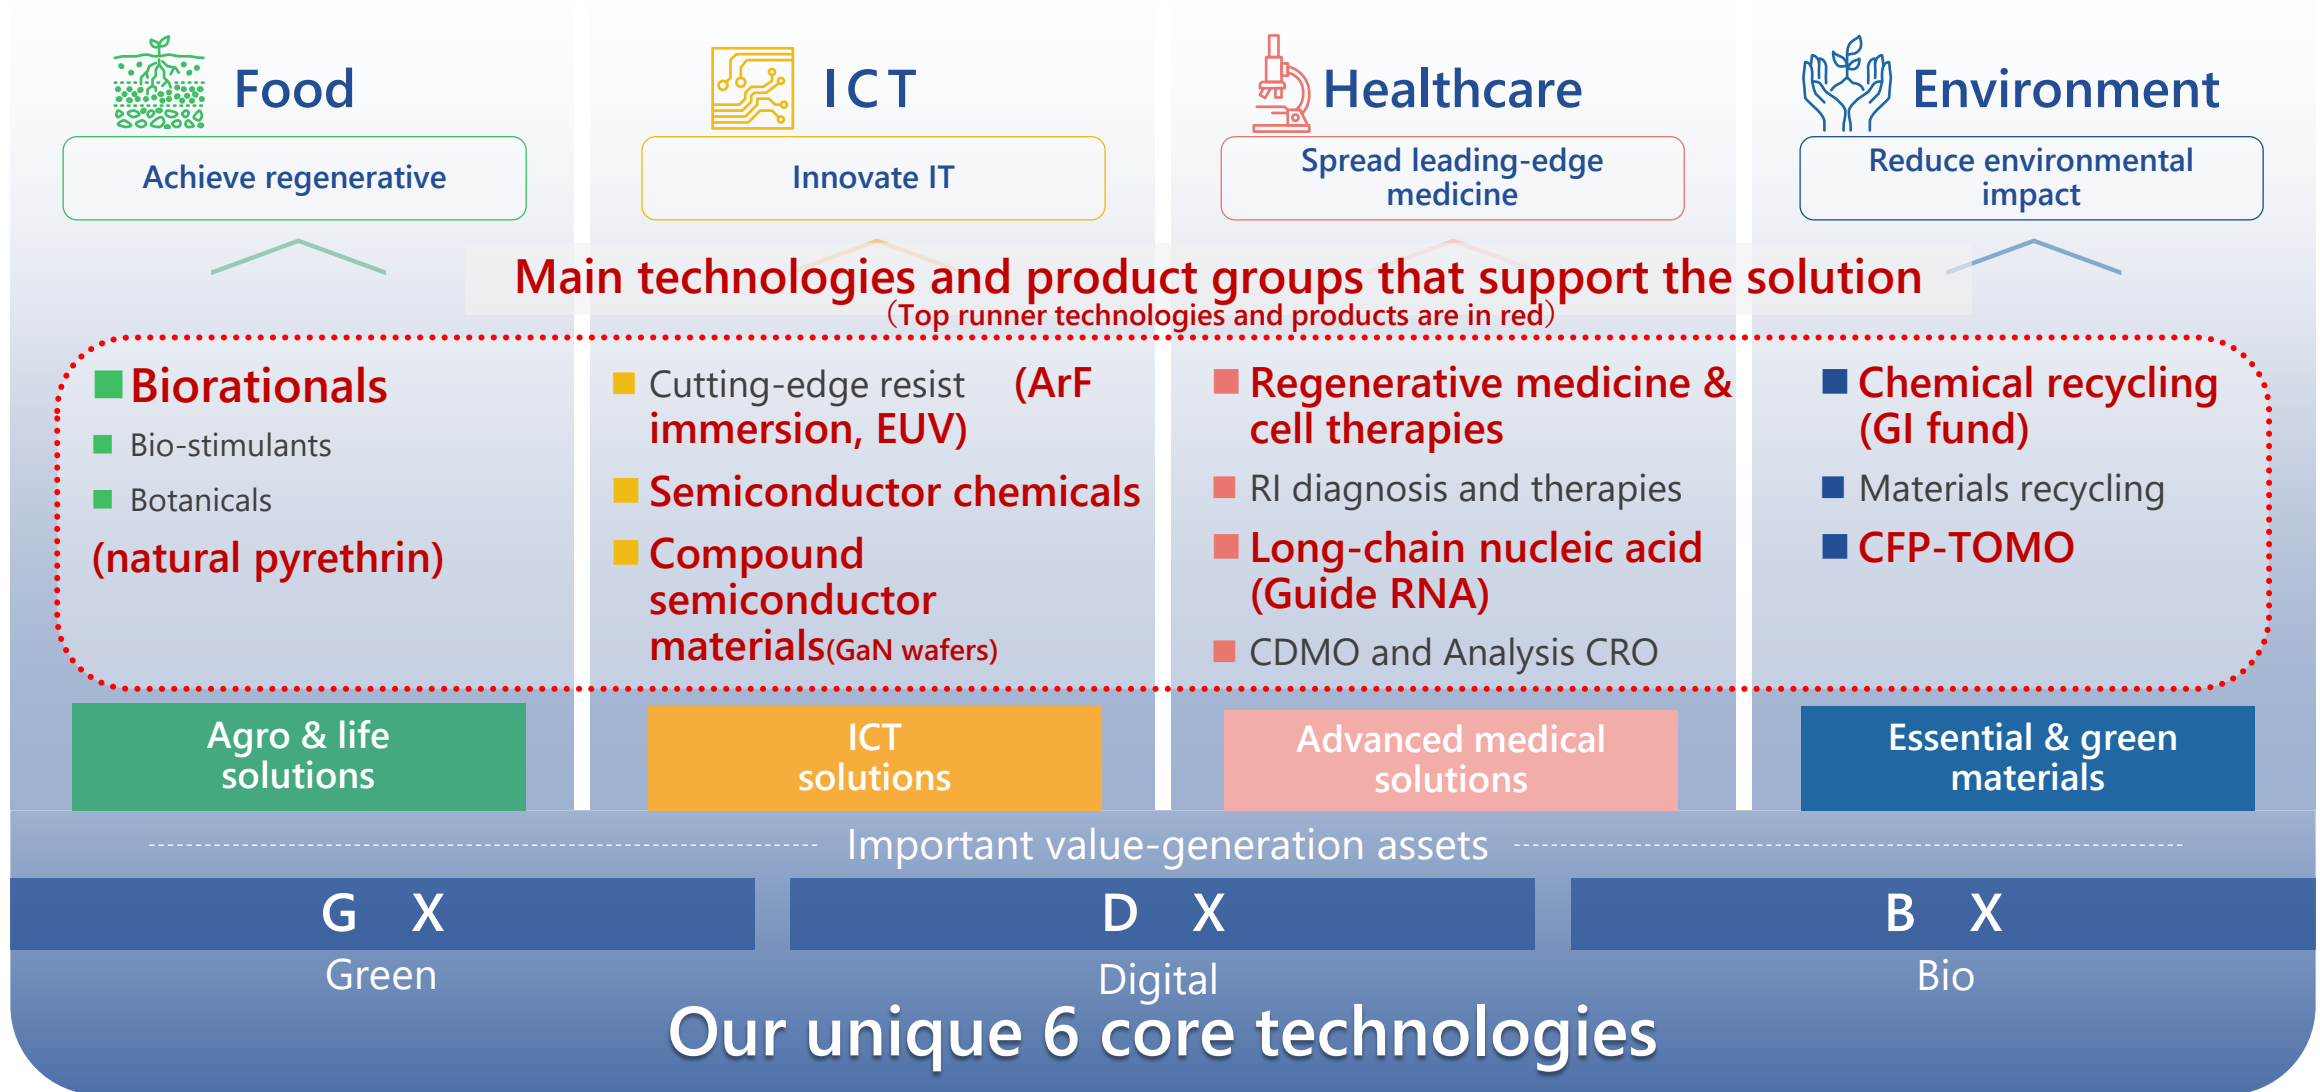

- Deepening severity of climate change issues
- Increasing importance of maintaining the ecosystem

Long-term vision :

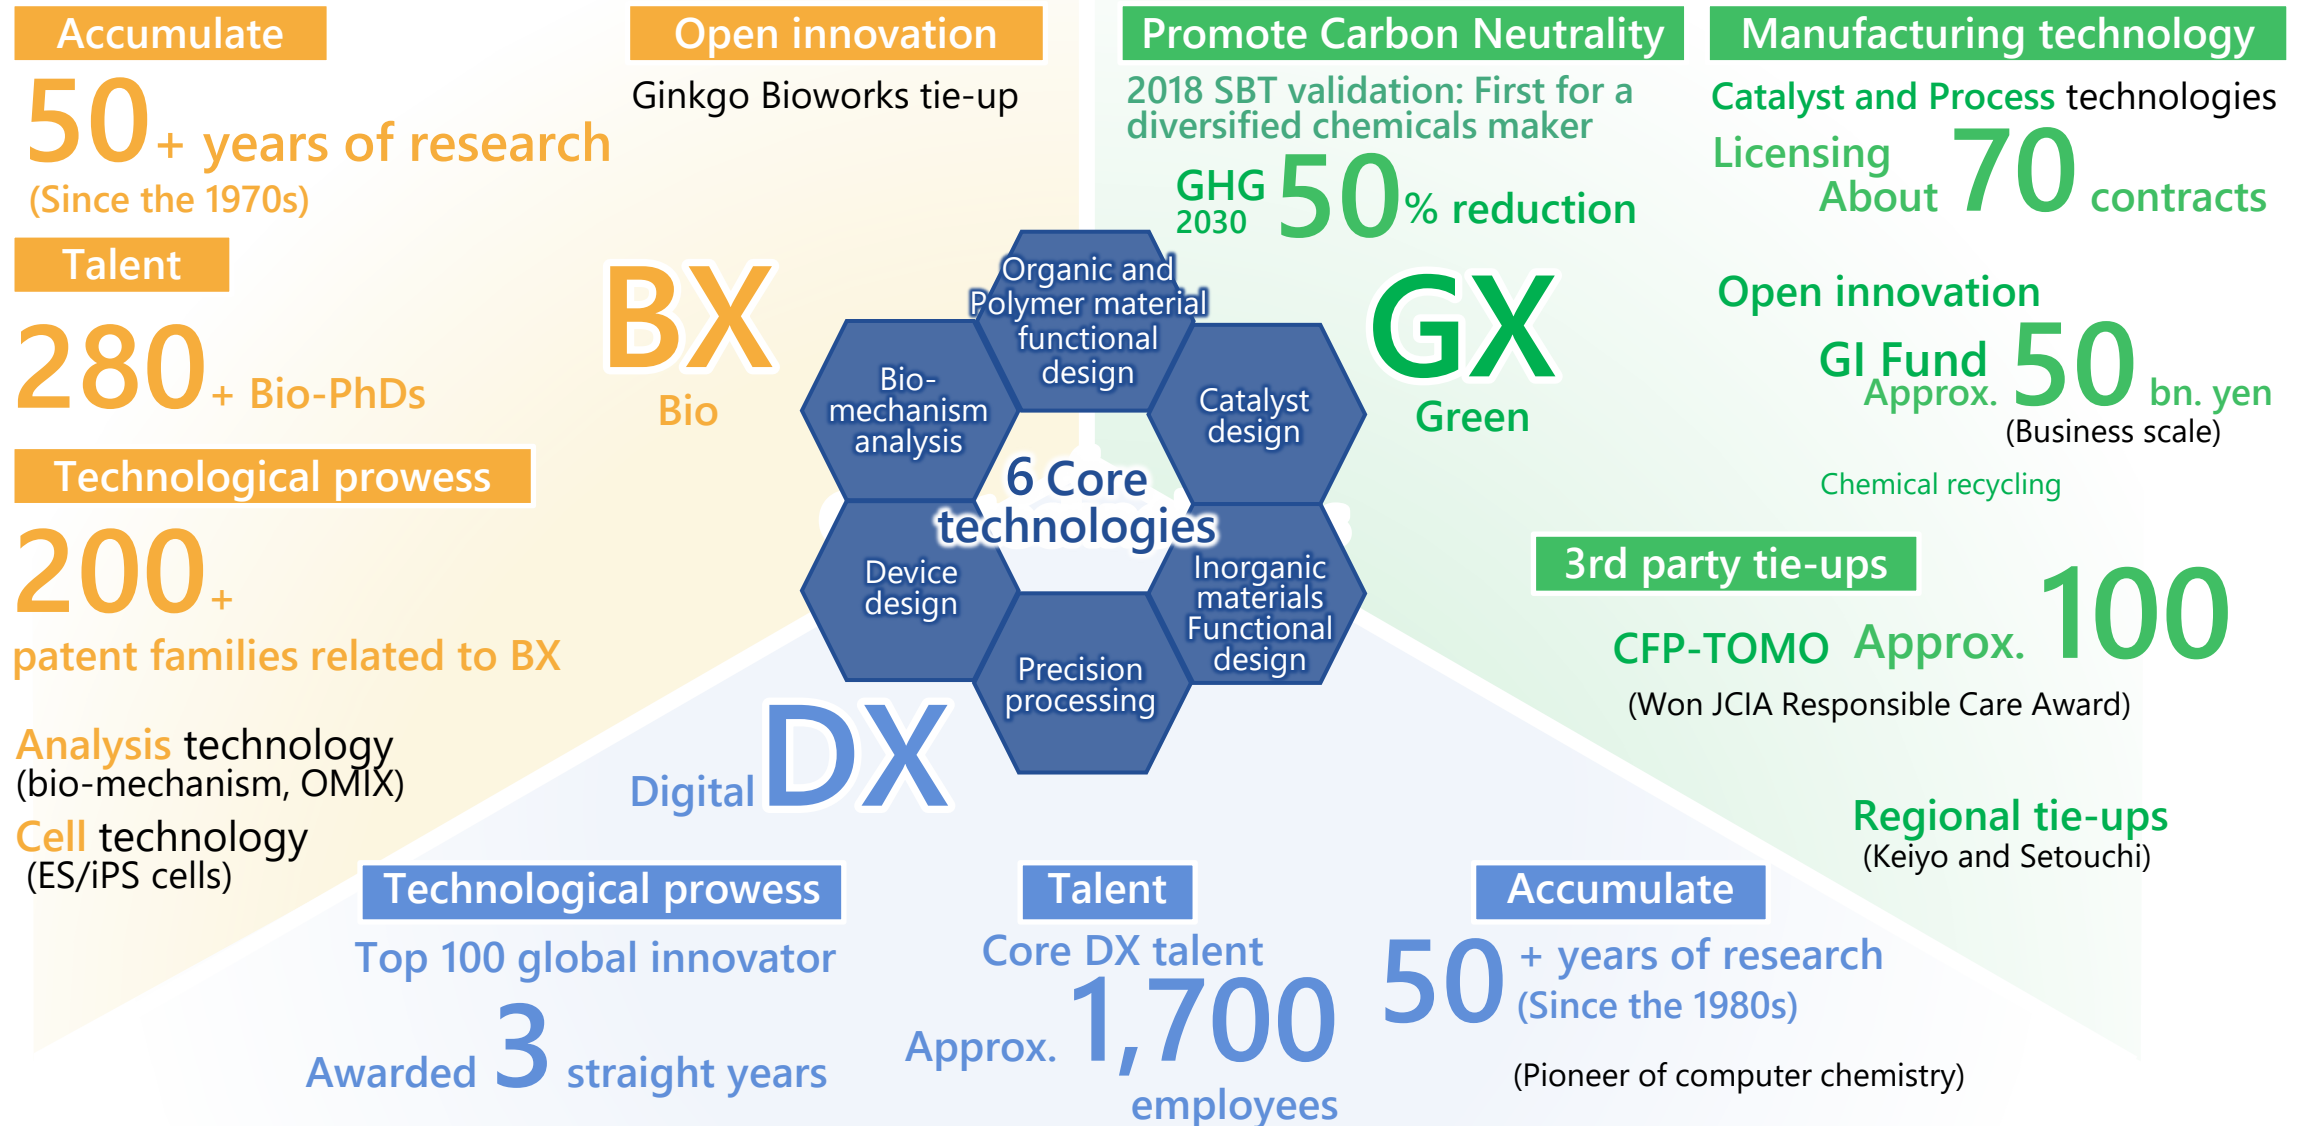

A company that solves social issues with innovative technology

Slide reused

Innovative Solution Provider

Strategic: 690 bn. yen
Maintenance: 420 bn. yen

(Billions of yen)

6-year allocation to strategic investments

- Agro & life
- ICT

Approx. 30% **75%**

Average from past 10 years

2025 ~ 2030

Concentrate investments of 400 to 500 bn. yen into Agro & life and ICT

Contribute to regenerative agriculture (agricultural productivity and sustainability) with a hybrid of agrochemical technologies along with biorationals, botanicals and other natural solutions.

Society's challenges

Carbon neutral

Natural capital

Food

Focus on the regenerative agriculture sector, which will become mainstream in the future.

- ✓ Agriculture such as no-till farming that repairs or improves soil health, reduces greenhouse gas emissions and maintains or enhances biodiversity
- ✓ Productivity gains are also important to secure food supply amid population growth

Our efforts

Strengthen portfolio

Investments done

2 blockbuster candidates

- Chemical crop protection
- Biorationals

Leverage footprint

Investments done

Brazil, India Footprint

- Brazil, the world's largest market
- India, with the highest market growth rate

Growth trajectory: Maximize the use of growing markets such as Brazil and focus on the regenerative agriculture sector.

Business strategy

- Pursue contributions to **regenerative agriculture** leveraging agrochemicals, biorationals and botanicals
- Leverage to the hilt sales footprint in growth markets such as **Brazil and India**
- Expand natural pyrethrin and deploy new botanicals
- Accelerate deployment of biorationals into **field of animal nutrition**

Target sales (annual)

Herbicides for
non-till
farming

100 billion yen

INDIFLIN etc.
B2020

100 billion yen

Biorationals
Botanicals

120 billion yen

Integrate businesses related to ICT and fuse core technologies and our wealth of know-how to provide solutions to accelerate customer innovation.

Future areas for earnings growth

Semiconductor chemicals

Exhibit sophisticated functionality supporting customer needs in semiconductor manufacturing processes

Leading-edge semiconductor materials

Forge new markets on the front and back ends through process technology innovations supporting AI semiconductors

Entry into US semiconductor business

Leverage new Texas plant as a foothold to greatly expand our US semiconductor chemicals business (high purity and performance)

Our strengths

- Chemical design capabilities and know-how in high-purity chemicals
- Solutions proposal capabilities with speed and advanced technology

- Support next-generation needs with a broad range of material design and organic synthesis technology
- Fuse high-performance materials with process technology to deliver customer value

Path toward growth: Aim for 100 bn. yen in Core Operating Income through deeper dive into earnings model for semiconductor materials

Business strategy

Expand business

- ✓ Aim for top share in next-generation EUV with **proprietary organic EUV molecular resist**
- ✓ Actively introduce semiconductor back-end process materials, where technology is transitioning

Expand business geography

- ✓ Full foray into US mainly in semiconductor materials

Maximize earnings in existing businesses

- ✓ Display materials
Major portfolio shift. Shift from large polarizers and FPD chemicals into performance materials for OLED and automotive applications
- ✓ Silicon semiconductor materials
Strengthen supply structure in advanced of growth in demand for photo resist and semiconductor chemicals

Toward long-term growth

- ✓ Earnestly advance development of next-generation displays and power semiconductor materials, which are expected to grow rapidly in the early 2030s

Growth strategies: Advanced medical solutions

Contribute to healthier and more fulfilling lives by creating and delivering solutions that meet a diverse range of medical and healthcare needs by fusing biochemistry and DX technologies

Target areas

Leading-edge medical and healthcare related businesses such as CDMO

Knowledge developed in the life sciences business
(development, production technology, quality control and analysis)

Areas with high market growth potential and high added value for society

Drug market size by modality

Small molecule

Antibody drugs

2030

Approx.

114 trn. yen

Other

Our focus business domains

Cell therapies Nucleic acid/genes

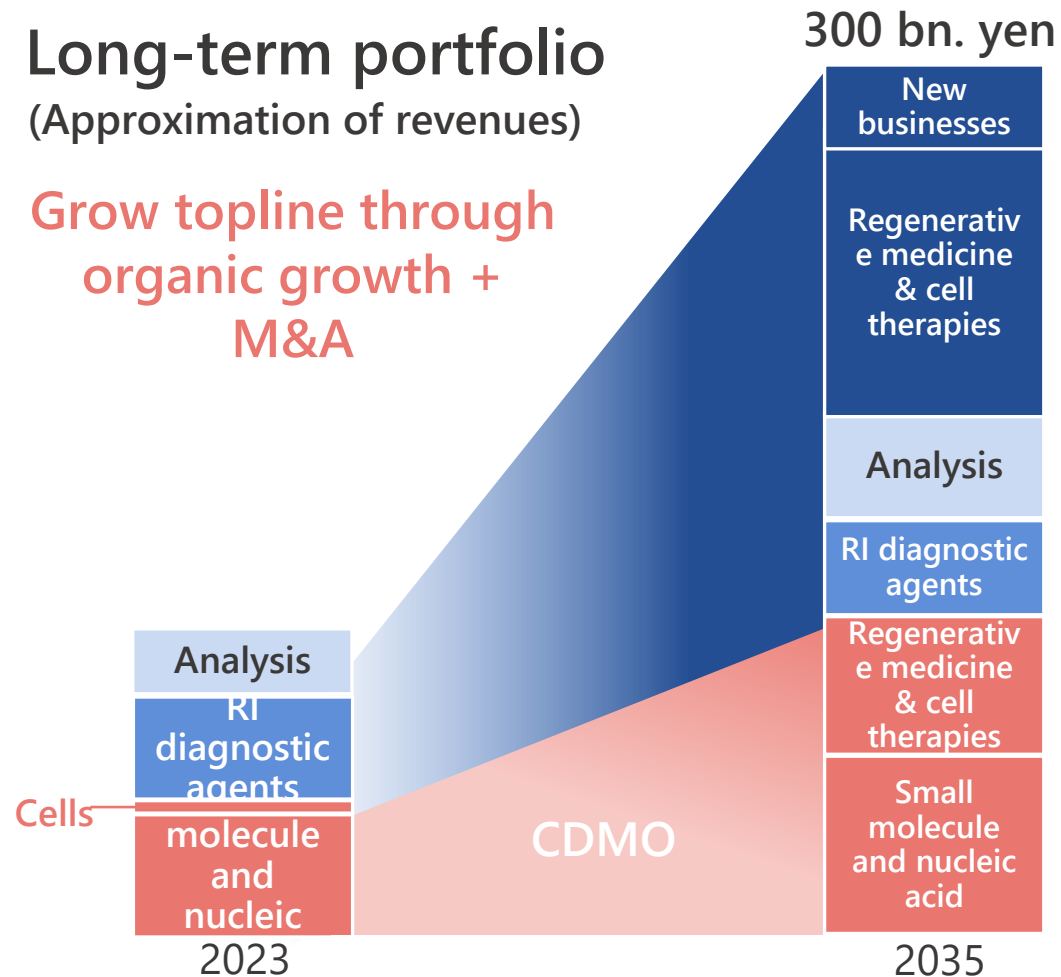

Position leading-edge medical-related businesses at the core while we also pursue diagnosis and prevention, medical materials and the like

Path toward growth: Strengthen leading-edge medicines CDMO business and deploy regenerative medicine and cell therapies

Long-term portfolio

(Approximation of revenues)

Grow topline through
organic growth +
M&A

Business strategy

Regenerative medicine & cell therapies

- ✓ Accelerate deployment into US market leveraging **iPS cell commercialization technology**

CDMO (small molecule, nucleic acid, regenerative medicine & cell therapies)

- ✓ Weaponize **strong synthesis capabilities** to achieve solid growth in CDMO business **targeting small to mid-size molecules**, where development is becoming more sophisticated
- ✓ Maximize **synergies with clinical therapies development** in regenerative medicine & cell therapies

Path toward growth: Establish position as a Solution Provider that contributes to a reduced environmental impact

Roadmap toward deployment of technologies that reduce environmental impact

Shift from investment-intensive petrochemicals business to solutions businesses featuring technology licensing

Business strategy

Expand businesses that reduce environmental impact

(Examples of candidate technologies)

- 1 Ethanol to propylene
- 2 CO₂ to methanol (ICR)
- 3 Olefins from direct cracking of waste plastic
- 4 PMMA chemical recycling, etc.

4 Chemical recycling demonstration facility

2 Pilot facilities manufacturing at high efficiency methanol from CO₂

Earnings contribution potential

Example: Ethanol to Propylene technology

Global production capacity of propylene in 2030

Approx. 200 million tons/year^{※1}

Apply technology to approx. 1% (2 million tons)

CO₂ reduction contribution

Equivalent to approx. 4 million tons/year

Contribution value (2035)

Approx. 20+ bn. yen/year^{※2}

※1 Prepared by Sumitomo Chemical based on data from Chemical Market Analytics

※2 4 million tons X carbon price of 10,000 yen ÷ 2n (assuming 50/50 split with deployment partner)

Investors' Meeting schedule and content

November 2023
Investors' Meeting for FY2023 1st Half Financial Results,
Management Priorities and Business Strategies

Immediate-term measures to
improve business performance

April 2024
Investors' Meeting for the Current Priority Management
Issues and Business Strategy

Fundamental
structural reforms (overview)

May-September
Preparation for new
organization

Autumn 2024
Investors' Meeting for the Current Priority Management
Issues and Business Strategy

Fundamental
structural reforms

October
New organization started

October-March
Formulation of
Cooperate Business Plan

March 2025
Investors' Meeting for the Corporate Business Plan

New Corporate Business
Plan announced

April-
New Corporate Business
Plan started

(Appendices)

Technological base: Superb new product development capabilities in both chemicals and biorationals

Chemical crop protection and Environmental health products

Organic compound functional design

New product development capabilities

Top runner

New product development capabilities

- Launch 5 chemical crop protection products from 2020 to 2024 **Industry leader**
- Developed and launched **2 blockbusters** INDIFLIN and Rapidicil

Biorationals and botanicals

Organic compound functional design

BX
(Natural compound synthesis)

Top runner

No. 1 share in biorationals and natural plant growth regulators

- Leverage foundation in organic chemistry and deploy into natural compound synthesis of microorganisms
- Business experience of 120 years in botanicals and 60 years on biorationals

Technological base:

Deepen core technologies in semiconductor materials and accelerate innovation

Advances in AI and other technologies will require miniaturization and new types of semiconductors

Photoresist

Compounding design
Organic synthesis technology

Proprietary molecular design
Synthesis technologies

Top runner

- One of the global share leaders in ArF immersion
 - No. 1 globally in EUV photoresists for specialty processes
 - New platform for next-generation EUV
- Begin development and performance validation of organic molecular resist

Semiconductor chemicals

High purity and analysis technology supporting cutting-edge

Chemical design
Process technology

Top runner

- One of global share leaders in high-purity chemicals (Global No. 1 in IPA and ammonia water)
- Supporting cutting-edge customer needs in performance chemicals

Growth area

Semiconductor back-end process materials

High heat-radiation materials
Specialty polymers

Precision machining
Material design

- Bring together internal performance materials and fuse with processing technological prowess developed in ICT business

Core of ICT solutions segment with superb technological prowess and sales capabilities

Dongwoo Fine Chem (South Korea)

Approx. 2,500 employees

Consolidated Net Sales: Approx. 250 bn. yen

Topics

New semiconductor chemicals plant

Increase production capacity to support increasing demand for cutting-edge semiconductor chemicals in light of new semiconductor capacity increases in South Korea.

New location in Iksan
Secure land in FY 2024 H2
To be in full operation from 2027

Upfront investments aimed at expanding demand

New R&D Center (Seoul)

Identify and develop cutting-edge technologies and materials for semiconductors and telecommunications
Located in an innovation hub connected into major ICT companies, universities and ventures in South Korea
Plan to begin operations in FY 2024 H2

Position at core of next-generation business development

Develop new fields with deeper dive into miniaturization process technologies

Leverage miniaturized process technology developed through our touch sensor business to establish technology in transparent LED and high-speed telecommunications materials. Currently being tested by customers.

Broader applications and deeper use of existing technologies

Technological base: Strong synthesis capabilities in small to mid-sized molecules and front runner in iPS cell commercialization

CDMO

(Small molecule and nucleic acid therapies)

Organic material
functional design

Chemical synthesis
process design

Top runner

Synthesis capabilities in high-purity long-chain nucleic acid and small to mid-sized molecules

- **Multiproduct production** regime leveraging multiple production facilities
- **Compliant with all** FDA/PMDA audits (10 from 2021 to 2023)
- **Began mass production at Guide RNA dedicated plant** at Oita Works
- Exhibit strong synthesis capabilities in increasingly sophisticated small **molecules (500+ molecular weight)**

Regenerative medicine & cell therapies

Organic and polymer
material functional
design

BX
(ES/iPS cell technologies)

Top runner

Frontrunner inside and outside Japan in commercialization of IPS cells

- Parkinson's disease treatment: Working toward approval in FY 2024
→ **Moving toward launch of world's first iPS cell-derived product**
- Completed the build out of an integrated manufacturing, sales and R&D regime in both Japan and the US

S-RAMCO Line 2
(under construction)

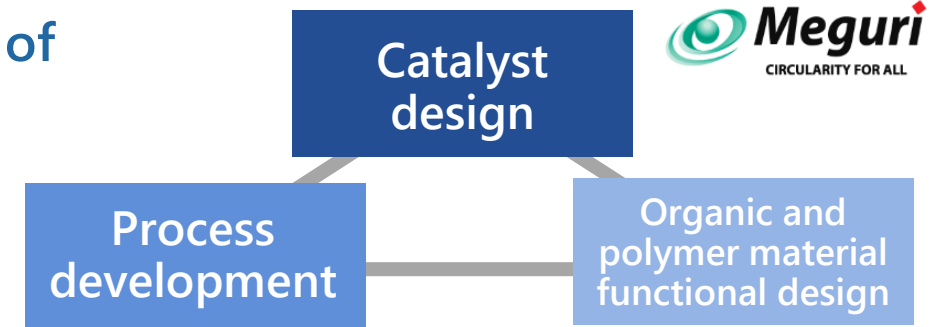

Sumitomo Pharma US
cell production facilities

Technological base: Accelerate commercialization leveraging catalyst design and other elemental technologies and a wealth of experience in deployment

- Elemental technologies supporting development of technologies that reduce environmental impact
- Track record of 71 licensing contracts in 16 countries
- Capabilities running large-scale projects

Chemical recycling of acrylic resin

Top runner

December 2022
Began operations at demonstration facilities

Materials recycling using waste plastic from automobiles

Top runner

March 2024
Began operations at demonstration facilities

Technology to manufacture at high * efficiency methanol from CO₂

Top runner

December 2023
Completed pilot facilities

Chemical recycling technology

4 projects including those above indicated with an asterisk* have been adopted by the GI Fund

Cautionary Statement

Statements made in this document with respect to Sumitomo Chemical's current plans, estimates, strategies and beliefs that are not historical facts are forward-looking statements about the future performance of Sumitomo Chemical. These statements are based on management's assumptions and beliefs in light of the information currently available to it and involve risks and uncertainties.

The important factors that could cause actual results to differ materially from those discussed in the forward-looking statements include, but are not limited to, general economic conditions in Sumitomo Chemical's markets; demand for, and competitive pricing pressure on, Sumitomo Chemical's products in the marketplace; Sumitomo Chemical's ability to continue to win acceptance for its products in these highly competitive markets; and movements of currency exchange rates.
