&

Outlook for FY2025
(April 1, 2025 - March 31, 2026)

May 14, 2025

(Cautionary Statement)

Statements made in this material with respect to Sumitomo Chemical's current plans, estimates, strategies and beliefs that are not historical facts are forward-looking statements about the future performance of Sumitomo Chemical. These statements are based on management's assumptions and beliefs in light of the information currently available to it, and involve risks and uncertainties. The important factors that could cause actual results to differ materially from those discussed in the forward-looking statements include, but are not limited to, general economic conditions in Sumitomo Chemical's markets; demand for, and competitive pricing pressure on, Sumitomo Chemical's products in the marketplace; Sumitomo Chemical's ability to continue to win acceptance for its products in these highly competitive markets; and movements of currency exchange rates.

1. Consolidated Financial Results for FY2024 Ended March 31, 2025

Summary of the FY2024 Financial Results

Actual Results for FY2024

Core operating income was 140.5 billion yen

(up 289.6 billion yen from the prior year)

(up 40.5 billion yen from the forecast announced in February 2025)

- Core operating income for FY2024 improved by approximately 290.0 billion yen from the prior year, and we achieved a V-shaped recovery from a historic core operating loss.
- Compared to the prior forecast, there was a greater increase in revenue due to an increase in sales of the three key products in Sumitomo Pharma and sales of display materials in ICT & Mobility Solutions.
- For capital gains on business dispositions, although some of them were deferred to the next fiscal year, results were mostly as expected.
- In terms of underlying performance as well, we achieved steady improvement in each quarter.
- ROIC was 2.2%.

Financial Summary

				(Billions of yen)
	FY2024	FY2023	Variance	Variance Ratio

2. Outlook for FY2025 Ending March 31, 2026

Forecast for FY2025

**Core operating income is projected to be 150.0 billion yen
(up 9.5 billion yen from the prior year)**
**Net income attributable to owners of the parent is projected to
be 40.0 billion yen (up 1.4 billion yen from the prior year)**

- Core operating income for FY2025 is projected to be **150.0 billion yen**.
- In terms of profit and loss in our underlying performance excluding the business dispositions, we project that, although there will be negative effects from currency fluctuations, there will also be a significant increase in profit from such factors as **an increase in shipments in each segment and a decrease in losses on investments accounted for using the equity method as a result of the decrease in ownership interest in Petro Rabigh**. We will aim for a profit of **100.0 billion yen**.
- For capital gains on business dispositions, **we anticipate the disposition of Sumitomo Pharma's business in Asia**, but project there will be a slight decline compared to the previous year.

Economic Conditions

- In the midst of increasing uncertainty over trade friction and policy management, the future prospects of the global economy will face an increased risk of a downturn. As financial market fluctuations and geopolitical risks continue, the path toward a stable recovery is difficult to foresee from such factors as uneven growth in regions.

Business Environment

	FY24 Act.	FY25 Forecast	Forecast for FY25
Crop Protection			Inventories in the overseas distribution chain for crop protection chemicals will be reduced and price competition will continue.
Methionine			There will be a lull in the improvements in the methionine market, and it is expected to decline.
Displays			There will be steady growth in devices-related components.
Semiconductors			Demand for semiconductors will show signs of a gradual recovery.
Petrochemicals/ Raw Materials			The petrochemical market will continue to have low margins.

Regarding the Impact of the US's Tariff Policy

FY2024 sales in the US: approximately 400.0 billion yen (of this, two-thirds was in Sumitomo Pharma)

Direct impact

Increased tariff costs due to our facilities in the US procuring raw material from outside of the US

- The tariff policy on pharmaceutical products has not been decided at the present point in time. But we anticipate that, even if it were to be implemented, the impact would be minimal due to the small amount of transaction value subject to the tariff.
- Regarding other businesses, we anticipate that we will limit the impact of the tariff policy through such countermeasures as passing on the cost to consumers, shipments within the tariff grace period, and the optimization of our global production and sales system.

Indirect impact

Impact on the supply chain and macroeconomic impact from a global economic recession

- At the present point in time, uncertainty is high and we are unable to foresee the situation, so this is not incorporated into our financial forecast. We have, however, included only the impact of shipments frontloaded in FY2024 in a portion of our businesses.

Financial Summary
