Forward-looking Statements

Statements made in this annual report with respect to plans, strategies, and future performance that are not historical facts are forward-looking statements involving risks and uncertainties. Sumitomo Chemical cautions that a number of factors could cause actual results to differ materially from such statements including, but not limited to, general economic conditions in Sumitomo Chemical's markets; demand for, and competitive pricing pressure on, Sumitomo Chemical's products in the marketplace; Sumitomo Chemical's ability to continue to win acceptance for its products in these highly competitive markets; and movements of currency exchange rates.

Financial Statements in This Document

Beginning fiscal 2017, the Sumitomo Chemical Group is adopting international financial reporting standards (IFRS) in place of Japanese GAAP, which it previously used, and is therefore restating figures for the previous consolidated fiscal year using IFRS for comparative analysis. However, as the consolidated statement of financial position was not calculated for the sectors using IFRS at the beginning of fiscal 2016, the sectors' ROA for fiscal 2016 were not calculated.

Editorial Direction

Since fiscal 2017, Sumitomo Chemical has adjusted the positioning of its annual report and CSR Report, reorganizing them as an integrated report, which is Sumitomo Chemical’s new Annual Report. With the aim of communicating its sustained growth in a way that is easy to understand for shareholders and other investors, as well as a broad array of other stakeholders, the new Annual Report comprehensively brings together financial information and non-financial information. In addition to a report on financial results and information on the strengths of businesses and business strategies, the Annual Report includes information on Sumitomo Chemical's corporate governance system, and its environmental and corporate social responsibility efforts.

The Annual Report 2019 starts with an image of boarding a Sumitomo Chemical airship, which is also on the front cover. This year, the beginning of the new Corporate Business Plan, we added a dialogue between the Chairman of the Board and the Outside Directors, a CFO’s message, and a section on ESG strategies to further enhance our content. We hope this Annual Report serves as a bridge to our stakeholders and communicates our efforts to create new value by mobilizing the entire Sumitomo Chemical Group.

The Guidance for Collaborative Value Creation, put forth by the Ministry of Economy, Trade and Industry, is a handbook that serves as a shared language connecting companies and investors, systematically and comprehensively laying out the information that companies ought to convey to investors in order to raise the quality of information disclosure and of dialogue with investors. This report primarily relies on this guidance in the value creation models for sector information (starting on page 40).
