Sumitomo Chemical commitment on Nufarm collaboration

“Sumitomo Chemical has committed itself to long-term business collaboration with Nufarm,” commented Mr. Fukubayashi, Director and Senior Managing Executive Officer, President of Agricultural Chemicals Sector, Sumitomo Chemical Co., Ltd.

“It is our firm commitment to deliver sustainable, simple and scientifically sound solutions for various global issues surrounding life, food and environment. We place high priority to innovate new technology, for example a mixture of glyphosate and flumioxazin or phenoxy herbicide to tackle the emerging glyphosate resistant weed issues particularly serious in genetically modified crops.”

“Sumitomo Chemical has devoted significant efforts toward this goal, and we will continue to encourage the on-going collaboration with Nufarm to achieve these visions without any changes in the level of our efforts.”
