**Sumitomo Chemical Reports
Consolidated Financial Results
For the Half-Year Ended September 30, 2018**

The Sumitomo Chemical Group's consolidated sales revenue for the half-year ended September 30, 2018, increased by ¥81.8 billion compared with the same period of the previous fiscal year, to ¥ 1,122.1 billion. The Group posted core operating income of ¥102.1 billion, operating income of ¥91.9 billion, and net income attributable to owners of the parent of ¥61.5 billion, all of which represented year-on-year declines.

Sumitomo Chemical decided to pay an interim dividend of ¥11 per share.

“Core operating income” is a gain and loss concept that reflects recurring earning capacity. It excludes gains and losses from non-recurring factors from operating income, including share of profit of investments accounted for using the equity method.

The Sumitomo Chemical Group's financial results by business segment for the half-year were as follows.

Petrochemicals & Plastics

Market conditions for petrochemical products rose because of higher feedstock prices. Market conditions for raw materials for synthetic fibers and methyl methacrylate (MMA) also increased. As a result, the segment's sales revenue grew by ¥60.3 billion compared with the same period of the previous fiscal year, to ¥380.4 billion. In addition, for associates accounted for using the equity method, the earnings of Rabigh Refining and Petrochemical Company improved because it was able to maintain a high level of capacity utilization. Because of such factors as the impact of periodic plant maintenance at the Chiba Works and in Singapore, however, core operating income declined by ¥6.5 billion, to ¥35.4 billion.

Energy & Functional Materials

Shipments of separators and cathode materials for lithium-ion secondary batteries rose on higher demand. Shipments of high purity alumina also increased, primarily for use in battery materials. As a result, the segment's sales revenue increased by ¥20.6 billion compared with the same period of the previous fiscal year, to ¥140.9 billion, and core operating income grew by ¥2.5 billion, to ¥12.8 billion.

IT-related Chemicals

Although selling prices of polarizing film and touchscreen panels declined, shipments of polarizing film increased due to growth in demand. As a result, the segment's sales revenue increased by ¥6.9 billion compared with the same period of the previous fiscal year, to ¥195.4 billion, and core operating income rose by ¥5.8 billion, to ¥14.8 billion.

Health & Crop Sciences

Shipments of agricultural chemicals increased, primarily in regions outside Japan, such as South America and Asia. On the other hand, currency depreciation of emerging markets had a negative effect on sales from overseas subsidiaries in yen terms. As a result, the segment's sales revenue was ¥138.1 billion, essentially unchanged from the same period of the previous fiscal year. Because of such factors as margin erosion from an increase in raw material prices, core operating income declined by ¥5.9 billion, to ¥2.5 billion compared with the same period of the previous fiscal year.

Pharmaceuticals

In North America, sales of Latuda[®] (atypical antipsychotic), Aptiom[®] (antiepileptic drug), and other treatments increased. On the other hand, results in Japan were adversely impacted by drug price revisions instituted by Japan's National Health Insurance. As a result, the segment's sales revenue declined by ¥5.4 billion compared with the same period of the previous fiscal year, to ¥242.7 billion. Because of the impact of the drug price revisions and higher sales expenses, and because a one-time gain was recorded in the same period of the previous fiscal year on the transfer of business, core operating income declined by ¥18.9 billion, to ¥39.3 billion.

Others

In addition to the above five segments, the Sumitomo Chemical Group engages in supplying electrical power and steam, providing services for the design, engineering, and construction management of chemical plants, providing transport and warehousing, and conducting materials and environmental analysis. The segment's sales revenue declined by ¥1.1 billion from the same period of the previous fiscal year, to ¥24.6 billion, and core operating income declined by ¥3.1 billion, to ¥3.2 billion.
