

The Sumitomo Chemical Group has contributed to society through our business activities since our establishment 100 years ago. Today's Sumitomo Chemical Group has developed as a result of our continuous efforts to contribute to society.

The Petrochemical Sector will help contribute to various industries and improving people's lives through our efforts to provide consistently high quality products while considering the environment.

Tomohisa Ohno
Senior Managing Executive Officer

The IT-related Chemicals Sector will continue to make an effort to enable people and make their lives more convenient. We aim to enrich society by developing technologies and providing high quality products that are essential to ICT devices.

Toshihisa Deguchi
Senior Managing Executive Officer

The Pharmaceutical Sector will contribute to the future of medical care and a healthy life for all by continuously providing innovative pharmaceutical products.

When working together, the more than 30,000 employees of the Sumitomo Chemical Group will continue to solve the problems of the world through our business activities.

We ask all of you to contribute your best efforts!

To realize our goal of a sustainable society, we would like to introduce our "Sustainable Tree" concept as a global project. We would like everyone in our group to contribute towards this concept, which will help the "tree" grow and bear fruit.

Let's consider together the good things we can do and the positive impacts that we can have on society through our activities at work and at home.

It is time to introduce our global project!

Our "Sustainable Tree" project will have its own dedicated web site.

Please post your efforts that help contribute to society.

Look!

We have outlined a set of 17 themes that we believe highlight some of the key global issues of our day.

① NO POVERTY	⑥ CLEAN WATER AND SANITATION	⑪ SUSTAINABLE CITIES AND COMMUNITIES	⑯ PEACE AND JUSTICE
② NO HUNGER	⑦ ENERGY SAVING AND RENEWABLE ENERGY	⑫ RESPONSIBLE PRODUCTION AND CONSUMPTION	⑰ PARTNERSHIPS FOR THE GOALS
③ GOOD HEALTH	⑧ GOOD JOBS AND ECONOMIC GROWTH	⑬ CLIMATE ACTION	
④ QUALITY EDUCATION	⑨ INNOVATION AND INFRASTRUCTURE	⑭ LIFE BELOW WATER	
⑤ GENDER EQUALITY	⑩ REDUCED INEQUALITIES	⑮ LIFE ON LAND	

First, please choose one of them.

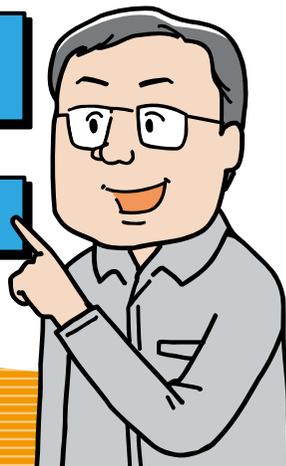

Think about the things you can do yourself to make the world a better place through your actions at work or at home. What difference can you make? (What actions have you already taken or will you take?)

Our Sustainable Tree

サステイナブルツ
Things We Can Do to Build a Sustainable Society

No.2

Hello! Have you posted to our "Sustainable Tree"?

Um ... What is it?

The "Sustainable Tree" is the Sumitomo Chemical Group Global Project for 2016. On the dedicated website, you can post "What each of us can do to make a positive difference in our world".

I see!

Hm... I wonder if I can make a difference to the improvement of the social issues?

The Sumitomo Spirit, that is embedded in our business philosophy, emphasizes "the Harmony between the Individual, the Nation and Society".

自利勿他
心身一如

It means that Sumitomo's business interest must always be in harmony with public interest.

Today the concept of "society" (including people, goods and information) has spread rapidly crossing our traditional national borders.

Relatedly, while the positives of society have spread across the world, I think that the social challenges and negative issues such as food and energy problems, spread of infectious diseases, and environmental pollution have become more global, too.

The scope of our recognized "society" has varied over history. Now we must consider society on a global scale.

With this in mind, after a lot of global discussion and debate, the SDGs - The Future We Want was established by the United Nations with a target achievement date of 2030.

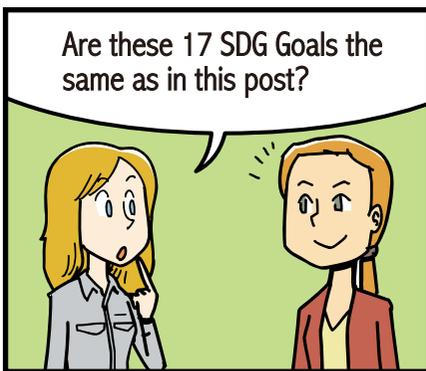

SUSTAINABLE DEVELOPMENT GOALS

[SDGs] (Sustainable Development Goals)

Working toward a sustainable world, 17 goals were established to help us all focus so that we can solve problems on a global scale, such as inequality, poverty, food, health, climate change, environment, energy, and education.

That's right!

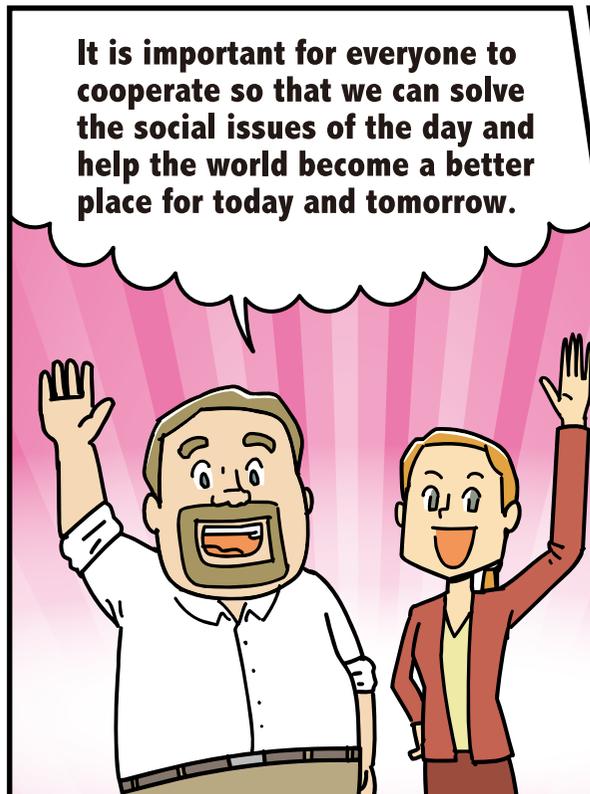

The 17 Social Issues of our "Sustainable Tree" are based on the 17 SDG Goals.

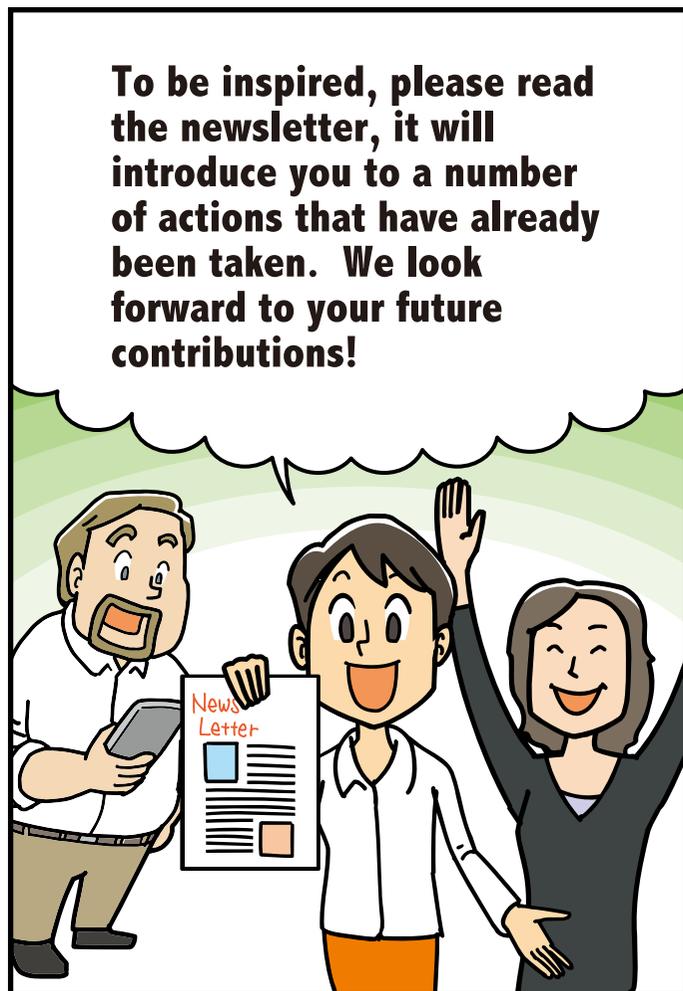

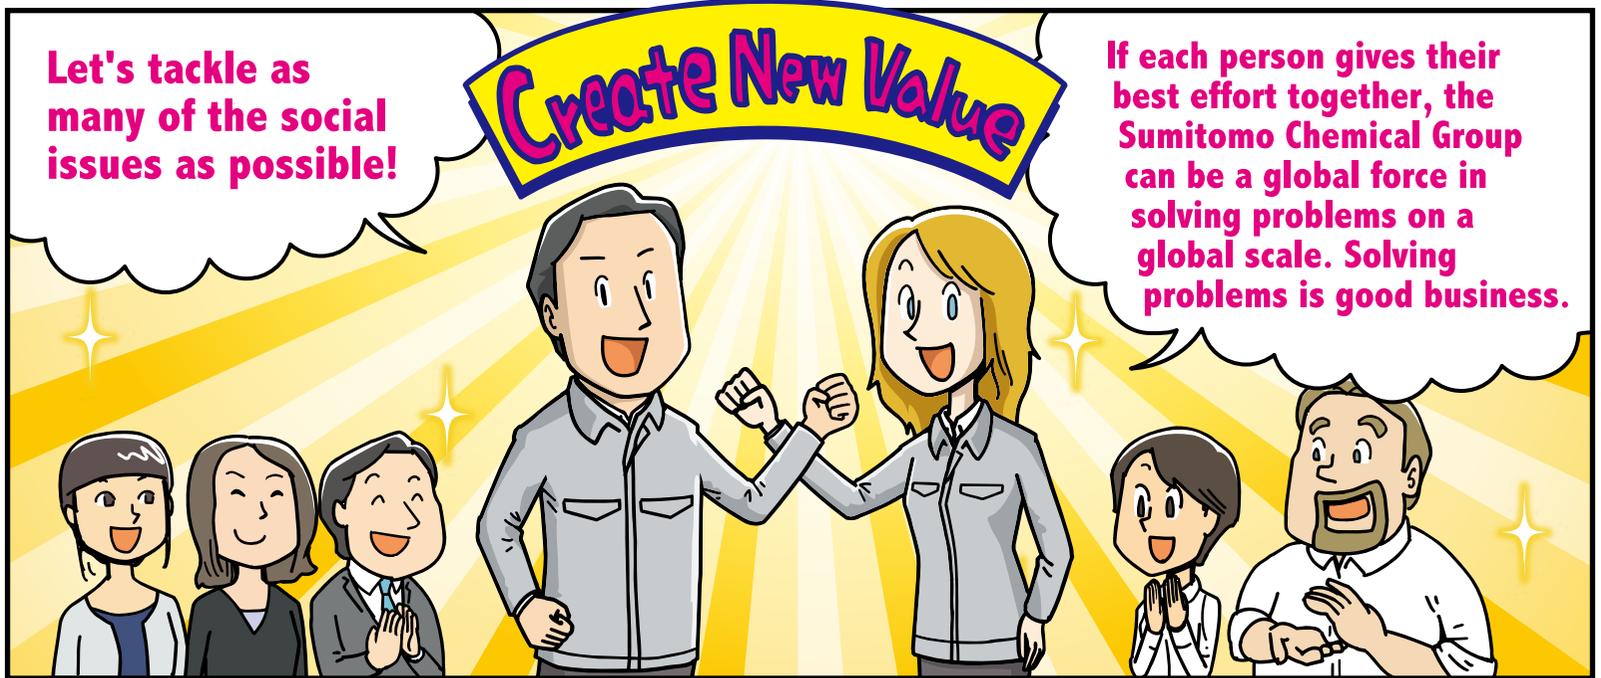

SDGs (Sustainable Development Goals)

After All!

Overcoming disease, discovering new treatments to improve health and technological advancements benefit everyone.
