

① Our Sustainable Tree

The concept of sustainable tree can be likened to a tree rooted in society representing the agglomeration of products, technologies, employees, and initiatives of the Sumitomo Chemical Group: a tree that grows as we edge forward toward a more sustainable society.

② Products

We will provide various products that will contribute to solve global scale problems to build a sustainable society.

③ Supply Chain

Products are shipped in various forms. Various employees are involved in delivering products safely and reliably to customers.

④ Besshi Copper Mine

Sumitomo Chemical's history dates back to 1913. The company got its start by producing fertilizer from harmful gas emitted in copper smelting operations. The business helped mitigate the environmental problem caused by the emissions, while also contributing to increasing agricultural crop production.

⑤ SDGs

Through the common language of the 17 SDGs, each individual considered social issues and what they could do to address these issues, posting on the dedicated Website.

⑥ Executives and Employees

Each one of SCG members aims to achieve a sustainable society, by listening to the voice of society which changes on a daily basis, and continuing to challenge the ingenuity and improvements that can be in their own, in cooperation with each other.
