

An illustration expressing the basic concept of “Our Sustainable Tree”

Products: We will provide various products that will contribute to solve global scale problems to build a sustainable society.

Supply Chain: Products are shipped in various forms. Various employees are involved in delivering products safely and reliably to customers.

Besshi Copper Mine: Our group's roots. Our sustainable tree is formed with history and efforts piling up. Towards a sustainable society, it will continue to be formed by employee's daily efforts in the future.

Efforts in daily life: in celebration of the Company's centennial, we implemented “Centennial Give Back” to carried out social contribution activities.

Efforts of Social Contribution Activities: We conducted a fundraising activity "School Aid for Africa" to donate textbooks, desks, etc. to elementary schools in Africa in 2014.

Each one of SCG members aims to achieve a sustainable society, by listening to the voice of society which changes on a daily basis, and continuing to challenge the ingenuity and improvements that can be in their own, in cooperation with each other.
