Contributions to Communities

Basic Stance

The Sumitomo Chemical Group contributes to communities in accordance with the three following perspectives, which reflect the Group's Business Philosophy and the Basic Principles for Promoting Sustainability.

Community Commitment

We commit to a sustained coexistence and collaboration with local communities, utilizing our unique insights, expertise, and knowledge to address their ongoing challenges.

Personal Growth

We encourage personal development through our active engagement in the communities where we operate, fostering individual insights and growth that support our business's social value creation.

Community of Care

We aim to broaden our sphere of empathy by conveying our community involvement, contributions and insights with a cohesive voice to all stakeholders.

Regarding communication with society, while enhancing information disclosure and engaging in interactive dialogue, Sumitomo Chemical, its worksites in Japan and overseas, and Group companies engage in a variety of activities to ensure harmonious coexistence with local communities. In this way, we are building good relations with them. Sumitomo Chemical works to foster smooth communication so as to improve the quality of its business activities as a community member. Going forward, while gaining the understanding and cooperation of local community members, we will proactively disseminate necessary information and, through continuous opinion exchanges with various stakeholders, will strive to foster greater understanding of the Company and earn more trust.

Note: The sections entitled "Contributions to Communities" and "Community Contribution Activities" refer to the "Social Contributions" and "Social Contribution Activities" the Group has undertaken up to now.

Management System

We are conducting activities that contribute to communities throughout the entire Sumitomo Chemical Group, including Sumitomo Chemical's Head Office, each worksite, and each Group company. To encourage such activities across the Group, we hold manager meetings attended by managers from each worksite, Domestic Group Company Liaison Meetings for domestic Group companies, and Regional Meetings in each region for overseas Group companies. These meetings enable attendees to share information and exchange opinions.

We are cooperating with the labor union in planning and conducting certain community contribution activities.

^{*8} Sumitomo Chemical appropriately and fairly makes donations to political organizations, taking into comprehensive consideration the cost burden of social responsibilities that a company should fulfill as a member of society and its duty to help stimulate economies and support society as well as significance to the Company's business. We make these donations in compliance with relevant laws and regulations and through a process defined in our in-house rules. (FY2024 Results: The People's Political Association 50 million yen)

Community Contribution Activities at Group Companies in Japan and Overseas

At Group companies in Japan and overseas, we emphasize community bonds and contributions at each business location and proactively conduct community contribution activities as a part of our broadly defined CSR activities, including creating shared value by leveraging the unique characteristics of each company.

In fiscal 2024, we conducted approximately 400 social contribution activities, including activities aimed at contributing to local communities and activities aimed at enhancing employee awareness through donations and fund raising.

The Sumitomo Chemical Group will continue to work toward helping solve social issues, educating employees, and providing integrated communication mainly through community contributions in collaboration with the Company's worksites, initiatives promoted by the entire Group in unison, and promoting education for citizens and the broader society while respecting the individuality of employees.

Examples of Initiatives

Examples of Initiatives (The Sumitomo Chemical Group)

Securing Safety and Health, and Protecting the Environment

- Work and research laboratory tours
- RC dialogues and distribution of local newsletters
- Malaria prevention campaign
- TABLE FOR TWO program
- Matching Gift program (support for tree-planting activities)
- Cooperation with U.N. activities
- Support for infection control measures
- Local clean-up activities

Raising Children Who Will Lead the Next Generation

- Establishment of in-house childcare facilities
- Launch of Young Inventors' Club, Science Workshops, etc.
- Sponsorship of community sports events
- Cooperation on civic and university courses
- Acceptance of student interns
- Matching Gift program (educational and developmental support for children)
- Educational support in Africa
- University scholarship programs

Assisting in Natural Disaster Relief

- Relief activities after typhoons, earthquakes, and other disasters Offering facilities for public use after major disasters
- Relief donations for victims of hurricanes, earthquakes, etc.

Clean-up Activity: Global Clean-up Challenge

The Sumitomo Chemical Group contributes to addressing waste issues and supporting resource recycling through clean-up activities at its worksites, as well as in local communities, beaches, and other nearby areas.

It is said that one of the sources of increasing marine waste, including plastic waste, is garbage left outside and waste thrown away that will enter waterways due to wind and rain then flow out to sea. The clean-up activities we can do at nearby locations are connected to countermeasures against the marine waste problem and actions for environmental protection.

The Group will continue to promote such activities as the "Global Clean-up Challenge" with a focus on environmental conservation, including the resolution of the plastic waste problem.

Securing Safety and Health, and Protecting the **Environment**

Initiatives to Ensure Safety at All Group Workplaces

The Sumitomo Chemical Group explains to neighboring residents our efforts to ensure safety, and work to deepen our mutual understanding. Specifically, every year, each worksite creates and publishes its own environmental and safety reports, detailing the initiatives taken at each worksite. The Ehime, Osaka, and Oita worksites disseminate information that is especially relevant to their communities by, for example, publishing community newsletters that are inserted into newspapers. Moreover, we proactively cultivate diverse two-way dialogue from a wide range of perspectives. Our activities include

regular dialogue meetings, opinion exchanges, and Works tours held with local community members, conducting risk communication model businesses in cooperation with municipalities, conducting support businesses focused on the environment and safety for local governments and companies, and holding community dialogues in collaboration with the chemical industry.

Matching Gift Program

As a community contribution activity with employees and the Sumitomo Chemical Group acting together since 2007, the Matching Gift program, which is run in collaboration with the labor union, collects donations from management executives and employees working at Sumitomo Chemical and Group companies. Sumitomo Chemical then matches their donations.

One of the beneficiaries of the donations from the Matching Gift program is the Organization for Industrial, Spiritual and Cultural Advancement International (OISCA),*1 with whom we work on various tree-planting projects. In collaboration with the labor union, we have been dispatching employee volunteers to help with these projects since 2008.

■ Matching Gift Program

- *1 The Organization for Industrial, Spiritual and Cultural Advancement International (OISCA) is a global NGO engaged in rural development and environmental protection, mainly in the Asia-Pacific region. The money donated by Sumitomo Chemical to this organization is used for its Children's Forest Program and Japan's Coastal Forest Restoration Project following the Great East Japan Earthquake.
- *2 ASHINAGA is an NPO established to provide physical and mental support for children who have lost their parents because of illness, accidents, or for other reasons. The money donated to this organization is used to provide a scholarship fund for these orphans.
- *3 Total sums after matching by the Company, donations from executives and employees, and company payments

TABLE FOR TWO Activities

Since May 2008, each of Sumitomo Chemical's worksites has participated in the TABLE FOR TWO (TFT) initiative. Participating companies in this Matching Gift program donate an amount of money equal to the total donated by management executives and employees.

When employees choose to eat any of the healthy TFT menu options available at the Company's cafeterias, 20 yen per meal is donated to help fight starvation in developing countries as well as obesity and lifestyle diseases in advanced nations. Through these types of social contribution activities originating in Japan, we are working to eliminate food disparity.

For the Company's support in 2024, Sumitomo Chemical received a letter of appreciation as a Platinum Partner from the TABLE FOR TWO secretariat.

Raising Children Who Will Lead the Next Generation

Supporting Education through Science Workshops

The Sumitomo Chemical Group holds science workshops for children to conduct experiments and make crafts. These workshops enable them to experience the wonders and appeal of science with their own hands, in order to convey in a manner that children can easily understand how the products all around them are linked to chemicals.

These science workshops are held during tours of plants and research laboratories and through class visits, including at schools near worksites and at summer vacation events sponsored by local municipalities.

In addition to holding science workshops at elementary schools near Ehime Works, we also open an exhibit every year at the science event held by the Ehime Prefectural Science Museum. Employees attended this year's event as lecturers and provided a hands-on experiment that utilized handicraft glue and water-based pens to create superballs. The children were engrossed in the experiments and provided such feedback as "chemistry is fascinating and fun."

A class visit

Platform for Learning Innovation - Japan

Sumitomo Chemical is a regular member of the Platform for Learning Innovation - Japan (PLIJ). PLIJ is an organization that collaborates with key players in industry, academia (technical colleges and universities), government (national agencies and research institutions), municipalities, and education (high school educators) with the main aim of

spurring innovation in elementary and secondary education, mainly in STEAM (science, technology, engineering, arts, and mathematics)

At an event sponsored by PLIJ, girls in junior and senior high school were able to listen to such topics as how women in the corporate workforce chose a career path. Some of the Company's female researchers and corporate employees participated. Speaking about career-building in the chemical industry as well as its appeal, they demonstrated the wide array of possible careers the girls could select.

Children's Forest Program—Child Goodwill Ambassador Talk Event 2024

Sumitomo Chemical has endorsed the activities of the Organization for Industrial, Spiritual and Cultural Advancement (OISCA), a public foundation striving to preserve the global environment, halt global warming, and conserve biodiversity. The Company also continues to offer support for initiatives that include the Children's Forest Program as well as the Coastal Forest Restoration Project, which supports recovery efforts following the Great East Japan Earthquake. In May of 2024, as part of the Children's Forest Program, elementary students from Thailand and Indonesia visited Japan as Goodwill Ambassadors and reported on their activities while visiting Osaka Works. This opportunity gave us a chance to once again consider the importance of addressing climate change and reducing CO₂ emissions.

A Child Goodwill Ambassador Talk Event

Support for Career Building via Company Visits and Hosting Tours

The Sumitomo Chemical Group endorses and collaborates in educational events that help junior and senior high school students think about building their own future careers. By hosting company visits and tours at our Head Office and worksites, we create opportunities to raise interest in the Company, which as a chemical manufacturer broadly supports people's lives. Through interaction with employees, we aim to broaden the students' perspectives on the future.

When 36 third-year students from a junior high school in Tokyo visited Sumitomo Chemical's Tokyo Head Office, we utilized SYNERGYCA to introduce the product lines that support the Group's global development as well as society as a whole. We also used it to convey the many types of jobs, beyond the ones you encounter every day, that support society. In addition, two young employees engaged the students in lively conversation, fielding questions that spanned such topics as their experiences in choosing a career, motivation for working, and advice about working in general.

Junior high school students visiting a company

Support for Education in Africa

Sumitomo Chemical has been supporting education to support children, on whom Africa's future rests, since fiscal 2005. At first, we mainly supported the construction of schools, but, after studying how to best offer support as a chemicals company, we branched out into supporting female students and programs in science as well as ICT-related education.

Supporting Plastic Recycling Education in Nigeria

Since fiscal 2020, the Company has supported an initiative in Nigeria that contributes to resource recycling, which is one of the material issues to be addressed as management priorities. Sumitomo Chemical has been contributing to the Clean Our World (COW) Project, which is run by the Nigeria-based Oando Foundation with the aim of raising awareness of plastic recycling.

Over 32 million tons of garbage are generated in Nigeria every year, and more than 30% of that is classified as plastics. Currently, most of the plastic is not properly disposed of. It sometimes clogs pipes, causing flooding, and is also washed into the ocean via West Africa's main waterway, the Niger River. To resolve this situation, the

Oando Foundation established the COW Project in 2020. Through this project, we provide opportunities for elementary school children, those who will lead the future, to learn about the plastic waste problem and recycling, conduct local clean-up activities, and share out experience in collecting waste and processing it into daily commodities. A portion of the around 11 tons of plastic waste collected through this initiative was converted into school supplies and other products and given to children.

Going forward, Sumitomo Chemical will continue working to improve the educational environment as an important social contribution activity and actively promote initiatives aimed at resolving social issues on a global scale.

Assisting in Natural Disaster Relief

Support for September 2024 Noto Peninsula Floods

In support for those affected by the September 2024 Noto Peninsula Floods, we gathered relief donations (¥3,771,500) from employees through the Red Cross of Japan as well as ¥5 million through matching programs for a total donation of ¥8,771,500.

Support for the April 2024 Hualien Earthquake

We contributed ¥3 million in support for those affected by the April 2024 Hualien Earthquake through the Red Cross of Japan.

Support for Recovery from the Great East Japan Earthquake

Since the Great East Japan Earthquake of 2011, we have been promoting initiatives involving employee participation to keep the memory of the disaster fresh in people's minds. We have also been providing donations collected through the sale of "Disaster Hit Area Support Meals" served in our cafeterias since April 2011. We further expanded our efforts after joining the SANRIKU JOBAN MONO NETWORK in January 2023 in part by changing the name of our menu to the Sanriku Joban Support Menu and increasing the number of mealy provided at the Tokyo Head Office. We also served food made with ingredients from the Sanriku-Joban region at Company conferences held at our Osaka Head Office. Under this scheme, a portion of sales is donated to a business that aids orphans in areas hit by the disaster, and the companies match that amount.

Since fiscal 2013, through the Matching Gift program, we have participated in the OISCA coastal woodland rejuvenation project aimed at rejuvenating black pine coastal woodlands in Natori, Miyagi Prefecture. Since fiscal 2015, we have dispatched employee volunteers to the area to provide, plant and manage the growth of black pine saplings with the aim of rejuvenating about 100 hectares of coastal woodland. These activities were suspended from fiscal 2020 to fiscal 2023 to prevent the spread of COVID-19, but in fiscal 2024 the secretariat and 15 employees from the Company and

Group companies joined a volunteer effort. Coastal woodland rejuvenation not only protects the residential environment and rice paddies of neighboring residents from salt damage, but also provides dwellings for wild birds and mammals, thus contributing to the conservation and restoration of biodiversity. We will continue these activities into the future.

Tokyo Head Office Held the Ishikawa Product Exhibition to Support the Noto Peninsula

With the cooperation of Sumika Partners Co., Ltd., we co-hosted the Ishikawa Product Exhibition to Support the Noto Peninsula on March 26, 2025, in the cafeteria of our Tokyo Head Office. The exhibition sold bento boxes made that morning in Ishikawa, which were transported to the venue by bullet train, as well as other products overflowing with local charm. Over 300 people visited the event, including the company president, and 1,078 products were sold for a total profit of ¥643,384. The day was an opportunity to raise awareness of the earthquake recovery while enjoying the wonderful products of Ishikawa.

Community Contribution Activities through the Sumitomo Foundation

The Sumitomo Foundation was founded as a multi-purpose foundation in September 1991 by 20 Sumitomo Group companies, including Sumitomo Chemical, in commemoration of the 300-year anniversary of the opening of the Besshi Copper Mine, which is the foundation of the Sumitomo Group. With a fund comprising the managed profit of the foundation's assets, the Sumitomo Fund provides aid for basic scientific research, environmental research, cultural asset maintenance and repair work, overseas cultural asset maintenance and repair work, and Japan-related research in Asian countries.
